

## **NOTICE OF WORK**

### **MISCELLANEOUS SIDEWALK BAY REPLACEMENTS**

- Various locations throughout East Gwillimbury

Sidewalk bay replacement work is expected to take place in the Town starting the week of September 18, 2017. This work is anticipated to last approximately one week, weather permitting. The contractor for this project is Tri-Capital Construction Inc. (Contract No. T-2017-12).

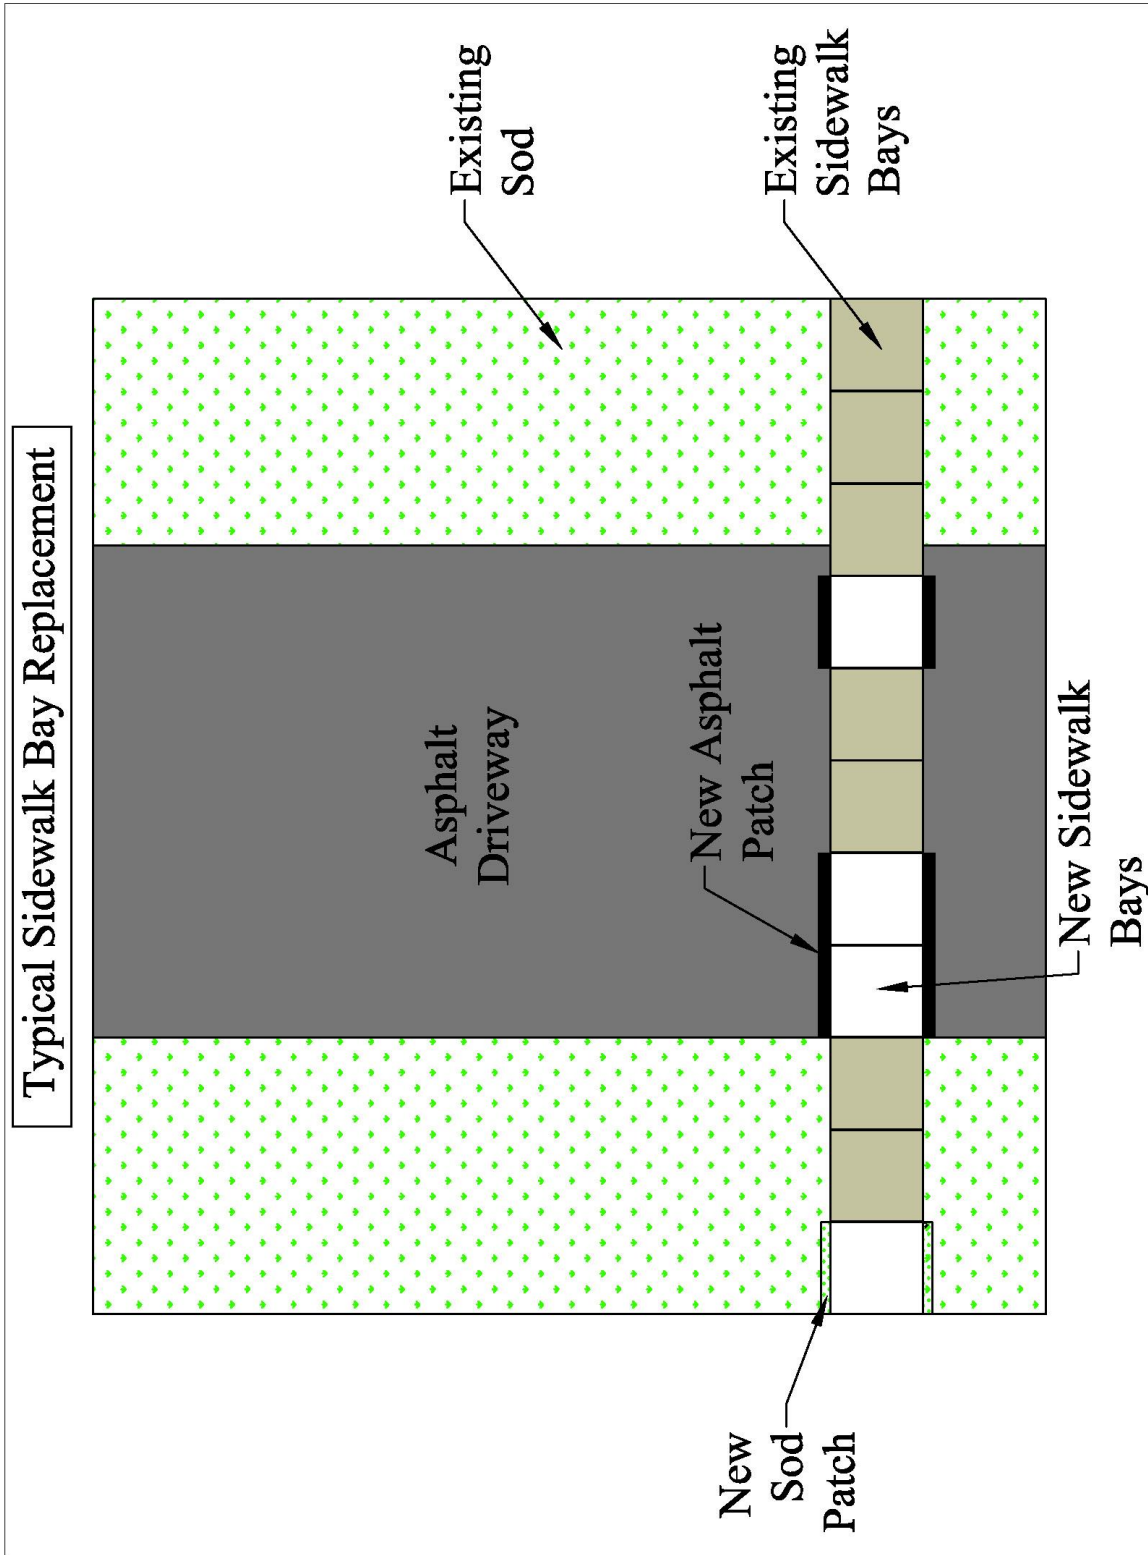

All reasonable measures will be taken to ensure a non-intrusive construction process, however, in cases where private infrastructure is installed on Town property without consent, damages may occur as a result of construction and will be the responsibility of the property owner to repair. This may include items such as sprinklers, invisible fences, private wiring, etc. During the project, we will make a concerted effort to maintain access to driveways, however, driveway access may be interrupted at times.

Due to the formwork required for pouring new sidewalk bays, any replacements that take place in front of an asphalt driveway will require asphalt patches on both sides of the sidewalk. Please see the illustration on the next page for details.

To ensure an effective and efficient project, please ensure vehicles parked on driveways are buffered from identified sidewalk replacements. Should the sidewalk replacements span across your entire driveway, the works will be phased to allow a vehicle width to get through, as a minimum.

*"Our town, Our future"*

Sidewalk bays that are scheduled to be replaced will be marked with orange paint before work begins. Although all efforts are made to ensure on-site paint markings are accurate, locations may be added or removed as necessary.
