

FOR IMMEDIATE RELEASE

Town installs Wi-Fi access hotspots outside of three Town facilities

(East Gwillimbury, ON) May 11, 2020 - East Gwillimbury residents and visitors can enjoy free internet access outside of the Civic Centre, Holland Landing Community Centre, and Ross Family Complex. Signage and barricades have been installed at each facility that identify the location of the Wi-Fi access areas within each parking lot. Those interested in connecting to the Wi-Fi hotspots must park in one of the designated parking spots to successfully connect to the internet to ensure social distancing.

“We know that internet connectivity in EG can be challenging for some residents and it is our hope that this new service will provide residents with the access they need during these challenging times. With many residents staying home, it is important that we provide any assistance that we can and providing this internet access will hopefully be helpful to our residents.” says Mayor Virginia Hackson.

The new Wi-Fi hotspots can be accessed within 12 meters at the following locations:

- Civic Centre - front entrance visitor parking spaces
- Holland Landing Community Centre - front entrance facing the windows
- Ross Family Complex - front entrance facing the windows
