

Sports Complex Renovation Update

Lobby takes shape, new façade is unveiled

Spring Fling a great success!

The minor hockey tournament to wrap up the season was a big success, with 42 teams from around the region getting a sneak peak at our sports complex. The front parking lot took on a "Hockeyville" setting with barbequed food and a skills competition in the tent. We have received many kudos and expressions of thanks from organizers, players, and citizens for working cooperatively with the contractor and our minor hockey association to help ensure this end-of-season event was successful.

Link & lobby

The link and lobby area has been glazed and roofing is expected to go on within the next week. The new façade, with its energy efficient glazing and aluminum facing, is complete and the tarp has finally been removed. We are putting finishing touches on the proshop and snack bar in the lobby.

Dressing rooms

We are close to finishing the dressing rooms and are working now with flooring, benches, utilities and hardware.

Glazing on the link and east entrance is complete.

The new façade, with its energy efficient glazing is complete and the tarp has been removed.

West Community Hall waits

Work on the west end cannot begin until the main entrance is complete. Meanwhile, the west entrance continues to be our main facility access. Therefore, the west end of the building is on hold. Once the centre link and main entrance are finished, we can close the west entrance and safely begin construction on the west community hall.
