THINKING GREEN!

Idling wastes fuel and sends harmful gases into the air contributing to smog and climate change. Despite common perception, over ten seconds of idling uses more fuel than restarting the engine. If every driver of a light-duty vehicle in Canada avoided idling for just five minutes per day, we would prevent more than 3,800 tons of carbon dioxide from entering the atmosphere and save 1.6 million litres of fuel. The Town encourages residents to avoid idling whenever possible and please fill out the Town's anti-idling survey.
