THINKING GREEN!

Filtering is a major cost of owning a swimming pool. Try reducing your filtration time to 6 hours per day, during off peak evening hours and through the night. If the water does not appear clean, increase the time in half-hour increments until it does. Most people who reduce pumping to less than 3 hours per day are still happy with the water quality and on average this can reduce the electricity demand by 60%.

MUSIC AT THE CIVIC SQUARE

Music at the Civic Square is back. Residents are invited to bring their family and friends to the Civic Centre on Tuesday evenings until August 26, 7pm until 8:30pm to enjoy a variety of musical performances featuring local entertainers.
