E. Water Service Pipe Sizing	• •							
Size and capacity of potable water s	vstem nine	shall be designed	in accorda	nce with 7.6.	3.1 of [Division B of the O	ntario Building	

Size and capacity of potable water system pipe shall be designed in accordance with 7.6.3.1 of Division B of the Ontario Building Code (OBC). Where both hot and cold water is supplied to fixtures in residential buildings containing one or two dwelling units, the water system may be sized in accordance with the tables in Part E1 and E2 of this form, provided, the minimum water pressure at the entry to the building is 200 kPa, the total maximum length of the water system is 90 m and the hydraulic loads for maximum separate demands on water distribution system piping are not less than 100% of the total hydraulic load of the fixture units given in Tables 7.6.3.2.A, 7.6.3.2.B and 7.6.3.2.D, of Division B, of the OBC for private use.
