CA-26-001 Council Orientation and Inaugural Ceremony

CAO Office

Version

Budget Deliberations Year 2026

Description

Project Description

This project encompasses the key activities required to support the successful transition and onboarding of a newly elected Council, including the Inaugural Ceremony, Council Orientation, and Council Member Onboarding. Funding will support the planning and delivery of the inaugural ceremony, covering costs such as venue setup, audio-visual equipment, hospitality, and ceremonial materials. It also includes orientation sessions designed to provide essential training on governance, municipal operations, and council responsibilities, with costs for facilitators, materials, and venue support. Additionally, the budget supports the purchase and setup of necessary technology, such as laptops, software, and mobile devices, to ensure council members are equipped to perform their duties effectively.

Project Justification

This allocation reflects historical spending, adjusted for inflation and modern requirements, and is critical to ensuring a smooth transition, operational readiness, and strong governance from the outset of the Council term.

Project	CA-26-002 Resident Service Experience and Improvement Lead
Department	CAO Office

Budget Deliberations Year 2026

Description

Project Description

Version

This role will lead the Town's efforts to improve service delivery through a performance-driven, resident-focused approach. It will oversee corporate performance management, continuous improvement initiatives, and organizational change, ensuring strategic priorities result in measurable improvements. Responsibilities include service reviews, data-driven decision-making, public engagement, and fostering a culture of innovation, equity, and accountability.

Project Justification

This position is key to modernizing how the Town delivers services and measures success. It ensures decisions are informed by data and community input, supports efficient use of resources, and improves transparency and responsiveness. The role will drive long-term service excellence and build public trust through continuous improvement and alignment with resident needs.

Project	CS-26-001 Website Replacement			
Department	Corporate Services			
Version	Rudget Deliberations	Year	2026	

Description

Project Description

Assess options to transition the Town website to a new and improved platform, and perform content review, journey mapping to support quality service experience, technical implementation, and change management initiatives.

Project Justification

The current website platform iCreate (hosted by GHD) will be retired in June 2027. The Town must select a new product to remain operational. This project will also enable the Town to improve accessibility of content on the website, and deliver an improved user experience.

Capital Projects

Project	CS-26-003 Network Infrastructu	re Replaceme	ent	
Department	Corporate Services			
Version	Budget Deliberations	Year	2026	

Description

Project Description

The Network Infrastructure Replacement program will replace existing Town Wi-Fi access points and switches when they are no longer supported by the manufacturer. The estimated useful life is 6 years for switches, and 10 years for access points.

Project Justification

By replacing infrastructure on a rotational basis the equipment will be reliable, secure, and costs will be spread evenly over time. Full detail of the equipment inventory and replacement schedule is available from IT.

Project	CS-26-004 Annual Hardware Replacement Program				
Department	Corporate Services				
Version	Budget Deliberations	Year	2026		

Description

Project Description

The Annual Hardware Replacement Program will replace existing laptops and desktop computers when they are no longer supported by the manufacturer warranty, typically a 4 year cycle. Other hardware included in this program are monitors, docking stations, headsets, keyboard, mouse, printers (except Xerox), TVs, audio visual equipment, and other computer peripherals. These types of equipment have varying useful life cycles and are kept in service until they can no longer perform their intended function.

Project Justification

The replacement of aging hardware is to ensure the Town has modern, reliable, and secure computer hardware technology. By replacing hardware on a rotational basis, the equipment will be reliable, secure, and costs will be spread evenly over time. Full detail of the equipment inventory and replacement schedule is available from IT.

Project	CS-26-005 Annual Security Audit	and Cyber Breach Support	
Department	Corporate Services		
Version	Budget Deliberations	Year 2026	

Description

Project Description

To provide annual, proactive security assessment by a 3rd party security consultant including penetration test on the Town's network, applying regular security patches on key network infrastructure and software, taking action to correct security weaknesses.

Project Justification

By performing proactive security assessments, regular security patches and penetration tests, the risk of data breaches are greatly reduced. By completing these annual processes, the IT Branch can ensure that the Town has properly addressed risk mitigation and has followed a compliance framework regarding frequent security updates. Some funding is included to be able to take action and solve any recommendations from the assessments.

Project	CS-26-006 Software Optimization					
Department	Corporate Services					
Version	Budget Deliberations	Year	2026			

Description

Project Description

Review current processes to evaluate the functionality of the Town's software solutions and implement improvements. Work with all departments to determine the best tools to digitally enable their work. This initiative includes establishing Artificial Intelligence best practises and work to safely adopt into work flows.

Project Justification

The continuous improvement of the Town's business solutions is vital to ensuring the investments in software technology have been realized to their maximum effect. Evaluating business process and determining how to utilize technology to improve them is an ongoing improvement initiative, increasing the quality and efficiency of the Town's service delivery.

Project	CS-26-007 Implement Enhanced Cyber Security Measures
Department	Corporate Services
Version	Budget Deliberations Year 2026

Description

Project Description

Special project to implement recommendations from 2025 security assessments, which includes Barracuda CloudGen Access implementation, passkeys or hardware keys for computer logins, complete enforcement of SSO/MFA for all software solutions, upgrade Exchange (email) server, implement Mobile Device Management.

Project Justification

The work planned in this project is essential for the Town to take another step forward to mitigate cyber security risk, effectively manage technology assets, and improve our response to incidents.

Project	CS-26-008 APS Software enh	nancement		
Department	Corporate Services			
Version	Budget Deliberations	Year	2026	

Description

Project Description

Enhancement to our current ticketing software management system (GTECHNA) to facilitate the Administrative Penalty System (APS).

Project Justification

The enhancement would facilitate the administration of all APS penalty notices which includes automated lifecycle of the ticket. This would reduce administrative workload, minimize delays in ticket revenue, and is a fully integrated payment solutions. This software program would provide online services and convenience for residents to pay, schedule appeals to dispute tickets all from a single platform. This enhancement is also capable of administering ASE tickets.

Project	CS-26-009 SUV Replacement (B16-31)			
Department	Corporate Services			
Version	Budget Deliberations	Year	2026	1

Project Justification Budget Deliberations Year 2026 Description Fleet Asset scheduled/forecasted replacement Project Justification

Forecasted end of lifecycle as determined through Fleet Management Strategy. This SUV is used by Bylaw services and has been extended two years past it's 7 year replacement cycle.

This unit will be retained as a spare vehicle to provide redundancy for assets being serviced and/or repaired. Given the lean fleet, a SUV is a strong candidate for a variety of year round use as required.

Project	FN-26-001 Regulatory Asset Management Plan Program			
Department	Finance			
Version	Budget Deliberations	Year	2026	

Description

Project Description

This program will retain the necessary professional services, contract resources, and a shared employee resource with IT to operationalize the Asset Management program at EG. It will support the development and production of the annual update of the Asset Management Plan (AMP) for all Town-owned assets and provide expertise to implement and embed asset management initiatives across departments. As part of this program, the Town will engage consultants to update asset values to reflect true replacement costs, prepare a State of Infrastructure report to provide Council and the community with a clear picture of current asset condition, performance, and replacement values, and build a standardized framework for producing annual AMP updates. In addition, part of the budget will be allocated to advancing the Single Source of Truth project, which is essential to eliminate data duplication, integrate information across Finance, Operations, and IT, and create one authoritative record of Town assets. This integrated approach will ensure that the Town maintains accurate, up-to-date information on its infrastructure, enabling stronger planning, reporting, and decision-making.

Project Justification

Under Ontario Regulation 588/17, the Town must update its Asset Management Plan (AMP) every five years to remain eligible for federal and provincial funding. Engaging consultants will ensure timely updates, accurate asset valuations, and transparent reporting through a State of Infrastructure report. They will also establish a standardized process for future updates. A shared IT resource and investment in the Single Source of Truth project will improve data integration, eliminate duplication, and support informed, data-driven infrastructure planning.

Project	LI-26-001 Chromebook Replacement				
Department	Library				
Version	Budget Deliberations	Year	2026		

Description

Project Description

The EGPL Chromebooks provide small laptops that have cloud storage and access to the internet to to the public. We schedule replacement to ensure quality laptops, that are current and in good operating order are available to our community. The Library loans Chromebooks to the public and uses Chromebooks for computer and technology education classes. Our technology classes are offered at all locations and provide those customers who require support to remain digitally literate. Some of our most vulnerable populations attend these programs; such as Seniors, Newcomers and Life Skills Adults.

Project Justification

Replacement will occur during 2026, with the existing Chromebooks being removed from service and replaced. Chromebook replacement - \$3900, Management Software Licenses \$650, Contingency for cost changes \$450. Cost to replace the Library's internal stock of Chromebooks for internal use and lending. Currently the Library has 13 Chromebooks, however we would reduce this number to ensure higher quality devices. These devices offer easy access for customers to complete work or school assignments while being easy to maintain for Library IT staff.

Project	LI-26-004 Library Material Capital Replacement					
Department	Library					
Version	Budget Deliberations	Year	2026			

Description

Project Description

The Library's physical items (Books, A/V) are funded through an annual capital program. The materials budget is used to maintain collection materials and ensure that the total inventory is current and available to the community.

Project Justification

The 2026 materials budget represents 5% growth on \$120,000 (2025 Budget) and an added \$45,000 to incorporate materials maintenance at the Queensville branch. The proposed increase reflects rising vendor costs and sustained demand.

Project	LI-26-005 Library Materials - Grow	vth .		
Department	Library			
Version	Budget Deliberations	Year	2026	

Description

Project Description

Library Materials related to growth at the Holland Landing and Mount Albert locations. This fund allows the library to purchase additional digital resources to meet the need of our expanding community and provide excellence in service delivery.

NOTE: \$400,000 HL Renovation Collection Allowance moved to 2032 to align with Facility Plan. The Expansion will increase the 7500 square footage of HL. This budget amount was based on the Queensville collection model and in alignment with the EGPL Growth Plan.

Project Justification

This budget is used to purchase additional library materials to keep up with growth related demand for library resources. In 2026, the Library will designate the \$5000 Capital project to expanding their multi-language collection to meet the diverse needs of our growing community.

Department	Library		
Version	Budget Deliberations	Year 2026	

Description

Project Description

Holland Landing Branch Reading Alcove and Study Alcove Refresh: Replacement of the bench top seating, lower shelving and flooring in the Children's reading alcove and replacement of the water damaged laminate edging in the Adult study alcove.

Project Justification

The Holland Landing Community Centre renovation has been re-scheduled to 2033. Basic maintenance is required in order to maintain the reading and study alcoves. The heating units in the reading alcove will be replaced by the Town and the Library will replace the affected bench, lower shelving and replace the carpet with laminate flooring that offers easy clean-up in the Children's area.

Project	FS-26-002 Hose and Frontline Equipment Replacement				
Department	Fire and Emergency Services				
Version	Budget Deliberations	Year	2026		

Description

Project Description

The addition and replacement of front line fire fighting equipment including hose, associated appliances, hand tools and equipment.

Project Justification

Replacing equipment within the designed life cycle and ensuring all fire department apparatus are equipped with the appropriate equipment in a standardized manner will improve operational performance and efficiency, safety, and departmental interoperability.

The standardization of all equipment supports a consistent and standardized training program within the organization, and ensures all staff are able to safely work anywhere with the organization. Failure to standardize equipment or replace within the designated life cycle increase the risk to staff, require additional training, and increased operating costs.

Project	FS-26-003 Personal Protective Ge	ear Program		
Department	Fire and Emergency Services			
Version	Budget Deliberations	Year	2026	

Description

Project Description

Replacement of personal protective gear including bunker coat, pants, and helmets in accordance with the National Fire Protection Association Standards.

Project Justification

NFPA standards mandate the replacement of fire fighting PPE (helmets, bunker pants and jackets) every 10 years.

The bunker replacement program includes the transition to PFAS free construction materials as part of the comprehensive cancer prevention program to reduce the exposure to know cancer causing chemicals that are used in the current bunker gear.

FS-26-004 Self Contained Breathing Apparatus Extractor/Washer

Fire and Emergency Services

Version Budget Deliberations

Year 2026

Description

Project Description

Self Contained Breathing Apparatus (SCBA) Extractor (Washing Machine)

The recommended unit is a commercial-grade, fully enclosed washing system specifically engineered for SCBA equipment. It uses high-pressure nozzles and rotational action to clean all surfaces of the SCBA harness, cylinders, and facepieces.

Project Justification

This business plan recommends the acquisition of a commercial SCBA Extractor as part of our comprehensive Cancer Prevention Program.

This specialized equipment will enable consistent and effective decontamination of the SCBA and facepiece significantly reducing carcinogen exposure and aligning with national firefighter cancer prevention strategies and industry best practice.

Project	FS-26-005 Hydraulic Extrication Tools Replacement				
Department	Fire and Emergency Services				
Version	Budget Deliberations	Voar	2026	\neg	

Description Project Description Purchase of new battery powered hydraulic vehicle extrication tools.

Project Justification

This business plan proposes the replacement of the last remaining set of hydraulic extrication tools which have reached end of life with a new suite of battery-operated tools. The last remaining hydraulic system is outdated, increasingly unreliable, and inconsistent with other extrication tools in the department's. All other EGFES apparatus equipped with newer style battery operated tools. Replacing the last set with the updated electric tools will complete the transition to a fully standardized, modern, and interoperable extrication tool inventory across the department.

Project	FS-26-007 F11-01 Apparatus Ref	urbishment		
Department	Fire and Emergency Services			
Version	Budget Deliberations	Year	2026	7

Description

Project Description

Fire apparatus refurbishment - EGFES Tanker F11-01.

Project Justification

Comprehensive refurbishment of a 2011 Fire Tanker to extend the useful lifecycle of this vehicle by an additional 10 years.

A third party assessment of this vehicle indicated this vehicle is candidate for refurbisment to extend the lifecycle to reduce fleet replacement cost. The current fire apparatus procurement timeline is aproximately 2 years. Approval of this project would eliminate the the approved 1.4 million dollar project from the 2024 capital plan. A portion of this saving would be realocated to future vehicle replacements to offset the rising cost of fire apparatus.

Replacement of a 2008 Pumper (282).						
Project Jus	stification					

This project is the replacement of a 17 year old pumper that currently serves as the departments only reserve apparatus. This new apparatus would enter into front line service and the moving the departments next oldest pumper into a reserve capacity. Current construction and delivery times for a pump are approximately 2 years. This current vehicle will be 19 years old when the new apparatus arrives.

A minimum of one spare apparatus is required at all times to maintain our currently level of service to account for scheduled and non-scheduled servicing.

Project	DS-26-001 Economic Developme	ent Strategic	Plan Update	
Department	Development Services			
Version	Budget Deliberations	Year	2026	1

Description

Project Description

Update to economic development strategy, including data collection and economic research, stakeholder consultation, target sector analysis, and identification of strategic themes, objectives, and tactics.

Project Justification

The current economic development strategy's timeframe is from 2021 to 2026, with the proposed new strategy beginning in 2027. This is an update to an existing strategy, rather than the creation of a new strategy, which requires less financial resources to complete, and will be led by staff, with support from external resources as required.

Version	Budget Deliberations	Year	2026	

Description

Project Description

YSpace Entrepreneurship programming, in partnership with the Town of Georgina, and York University, will include hands-on workshops, skill development, one-on-one mentorship, and targeted business development support, targeting early-stage entrepreneurs, home based, and bricks-and-mortar businesses.

Project Justification

Each municipality will fund the same amount and provide space for programming at no cost. An application will be submitted to the Rural Ontario Development Program to attempt to reduce this annual amount.

Since program inception in 2021, YSpace has supported more than 1,000 entrepreneurs, over 500 businesses, and has delivered more than 950 hours of business mentorship, leading to the successful launch and growth of local ventures and strengthened entrepreneurial ecosystems across both municipalities.

PR-26-001 Holland Landing Community Center Tennis Court Reconstruction

Year

Parks, Recreation and Culture

Version Budget Deliberations

2026

Description

Project Description

This project involves the complete reconstruction of three existing tennis courts, including demolition of current surfaces. Scope of work includes installation of new asphalt surfaces with acrylic colored coating, replacement of perimeter fencing posts, mesh, access gates, windscreens, tennis nets and posts. The project also includes full lighting replacement with new poles and energy-efficient LED fixtures.

Project Justification

The existing tennis courts have reached the end of their service life, with extensive cracking and surface deterioration posing significant safety hazards, including trip risks for users. The acrylic surface can no longer be repaired due to severe degradation and pitting of the underlying asphalt, necessitating full reconstruction.

These courts are heavily utilized by the East Gwillimbury Tennis Club throughout the playing season and are the second most active tennis facility in the Town. Ongoing concerns and complaints from user groups regarding poor playing conditions further emphasize the urgent need for replacement to ensure safe, high-quality recreational amenities for the community.

PR-26-002 Vivian Creek Park Redesign

Version

Parks, Recreation and Culture

Budget Deliberations

Year 2026

Description

Project Description

Vivian Creek Park redesign includes consulting services to develop conceptual and detailed designs for an upgraded playground and shade structure area, along with walkway and grading improvements to address surface water issues in low-lying areas.

Project Justification

The playground at Vivian Creek Park has reached the end of its lifecycle and requires full replacement. Its current location, along with the adjacent shade structure, is secluded and raises safety concerns for park users.

The concrete pads around the shade structure are significantly cracked and deteriorated due to prolonged exposure to wet conditions. Additionally, the existing walkway does not support access for garbage maintenance vehicles because of the shade structure's placement. Inadequate drainage also causes the walkway to flood after rainfall, limiting accessibility and usability. A redesign is necessary to address these safety, accessibility, and functional issues.

Project	PR-26-003 Harvest Hills Park Playground Replacement
Department	Parks Recreation and Culture

 Version
 Budget Deliberations
 Year
 2026

Description

Project Description

Harvest Hills Park playground replacement includes the demolition of the existing playground and removal of old protective wood fiber surfacing. Scope of work includes installation of a new accessible concrete ramp, junior and senior play structures, and new engineered wood fiber protective surfacing.

Project Justification

As part of the Parks asset replacement program, the playground at Harvest Hills Park, installed approximately 15 years ago, is due for replacement. Its proximity to Harvest Hills Public School results in heavy daily use, contributing to accelerated wear and tear. The park also serves as a popular destination for Newmarket residents during summer months because of the splash pad. The aging playground has limited remaining play value, with replacement parts no longer available. While Parks staff have maintained the structure to meet current safety standards, its functionality has significantly declined. Repairs were made to address various broken features however, a full replacement is required to ensure long-term safety and usability.

Project	PR-26-004 Anchor Park Pickleball Courts			
Department	Parks, Recreation and Culture			
Version	Budget Deliberations	Year	2026	

Description

Project Description

Installation of 2 new dedicated pickle ball courts including fencing mesh, posts, nets, asphalt surface, acrylic color surfacing and wind screens.

Project Justification

The sport of pickle ball has gained popularity, driven by a growing demand for courts among residents, particularly in older age groups. This fun and low impact sport allows recreational opportunities for all age groups and continues to grow throughout North America. The Parks Branch strategy is to provide the 4 Communities of East Gwillimbury with 2 dedicated outdoor pickle ball courts by 2026. Ross Family Complex in Mount Albert was the first site to receive 2 courts in 2022. Recently, Sharon Hills Park received 2 courts this year in 2025, this capital project will see 2 courts constructed at Anchor Park for Holland Landing in 2026. Queensville will see 4 pickle ball courts constructed as part of the Health and Active Living Plaza Park in 2026.

Department	Parks, Recreation and Culture			
Version	Budget Deliberations	Year	2026	

Description

Project Description

- 1) Playground Safety Surfacing Top-up of Engineered Wood Fiber at Holland Landing Community Center Park, Mainprize Park, Carnaby Park, and Sharon Hills Park
- 2) Nokiidaa Trail Indigenous interpretive signs/trail markers
- 3) Brenner Park Asphalt walkway installation
- 4) Mount Albert Community Center Park Installation of fixed/removable metal picnic tables

Project Justification

- 1) Playground Safety Surfacing Engineered wood fiber is a natural wood product and decays over time. Playground surfacing requires topping-up every 5-6 years to ensure the safety impact properties are maintained.
- 2) Nokiidaa Trail This project was requested through Corporate Services DEI Coordinator and was a strategic initiative identified in the Town's IDEAA Plan.
- 3) Brenner Park Asphalt walkway will provide accessibility to the existing playground for mobility devices and strollers for residents to use.
- 4) Mount Albert Community Center Stacking and burning of movable wood picnic tables has consistently been occurring. Fixed metal picnic tables will eliminate this issue.

Project	PR-26-006 Urban Forestry Techni	ician		
Department	Parks, Recreation and Culture			
Version	Budget Deliberations	Year	2026	

Description

Project Description

This capital project provides funds in 2026 for the current Urban Forestry Technician as a "Contract" position. This position was introduced in 2025 as part of the Town's enactment of the Private Tree Protection Bylaw.

Project Justification

The proposed Urban Forestry Technician position is a critical addition to the municipality's operational and environmental framework. As urbanization increases and environmental challenges intensify, the sustainable management of the urban tree canopy has become an essential municipal responsibility. This role supports the Town's strategic priorities in environmental stewardship, climate resilience, public safety, and community engagement through the implementation, enforcement, and continuous improvement of urban forestry programs and policies. Key responsibilities include private tree protection by-law administration and urban forestry maintenance management.

Project	PR-26-007 Tree Planting Program				
Department	Parks, Recreation and Culture				
Version	Rudget Deliberations	Year	2026		

Description Project Description Tree Removals (High risk dead trees) Tree Planting Program (Yearly)

Project Justification

Following the completion of the the Town's urban tree inventory in 2025, approximately 280 trees were identified as fully dead. These trees expose the Town to risk and require removal and stumping immediately.

The Towns yearly tree planting program started in 2024 with the creation of a Tree Planting reserve. This tree planting will replace trees identified for removal because of risk and also supports increasing York Regions tree canopy targets. This annual program will advance East Gwillimbury's canopy to meet these targets.

PR-26-008 Arts and Culture Master Plan

Parks, Recreation and Culture

Version

Budget Deliberations Year 2026

Description

Project Description

Developing an updated Arts and Culture Master Plan to replace the 2011 Culture Plan. This modernized arts and culture master plan will assess existing venues, performance spaces, studios and maker spaces. Complete an inventory of public art locations and identify new opportunities. Evaluate programming such as a theatre productions, art classes, music performances and community workshops. Identify gaps in arts and culture services and opportunities for partnerships with schools, arts organizations, community groups and local businesses. Engaged residents and the creative community to understand their priorities and provide an actionable long term strategy for investment in arts and culture infrastructure and programming.

Project Justification

Staff recognize the importance of developing an updated Arts and Culture Master Plan. The existing plan, created in 2011 no longer reflects the Town's significant growth, and expanding creative community. The community will benefit from an updated plan. EG is Canada's fastest growing municipality. Since 2011 the Town has experienced significant population growth and new neighbourhoods increased demand for spaces to create, perform and display art, a growing interest in community theatre, live music and artisan markets. More artists, markers and cultural entreprenuers are seeking local opportunities

Project	PR-26-009 North Union Community Centre Exterior Upgrades			
Department	Parks, Recreation and Culture			
Version	Budget Deliberations	Year	2026	

Description

Project Description

This includes a refurbish of the school bell assembly, heritage front doors and entrance, and exterior basement railings/concrete walls to maintain the facility and it's historical features.

Project Justification

North Union Community Centre is an established landmark within our municipality, reflecting the cultural identity, craftsmanship, and history of the community. Its preservation is integral to maintaining the character of our civic environment and demonstrating our role as responsible custodians of public heritage assets. In addition, the visible deterioration poses a risk to structural integrity but also to the safety of patrons and staff. Proactive refurbishment will prevent hazards, ensure compliance with heritage protection statutes, and guard the municipality against liability.

PR-26-010 North Union Community Centre Roof Assessment and Repairs and Maintenance

Parks, Recreation and Culture

Version

Budget Deliberations Year 2026

Description

Project Description

As a preventative maintenance measure, a roof assessment is required to make any necessary repairs to maintain the function and safety of the facility.

Project Justification

The roof is one of the most critical components of the building's envelope, protecting the structure, interior features, and heritage materials from water penetration and weather-related deterioration. Given the age of this building, there are growing concerns regarding the condition of the existing roof system. Signs such as moisture ingress, visible wear of roofing materials, and previous reactive repair works indicate potential underlying deficiencies. Without a thorough professional assessment, it is not possible to establish the full extent of issues or to plan an appropriate conservation response.

PR-26-011 Annual Facilities Program - Health & Safety, Accessibility and Security

nent Parks, Recreation and Culture

Version

Budget Deliberations Year 2026

Description

Project Description

The Annual Facilities Program is designed to strengthen municipal infrastructure by systematically addressing health and safety, accessibility, building security and inclusion initiatives within municipal facilities. Initiatives and enhancements identified by various user groups, committees, staff or members of the public will be considered.

Project Justification

We must ensure our facilities meet the minimum legislative and regulatory requirements (AODA guidelines), as well as provide an inclusive environment for all. These requirements are continuously evolving, and we must provide an opportunity for staff to undertake the necessary initiatives to deliver these standards.

Establishing an annual, council-endorsed program allows for planned, transparent prioritization of initiatives rather than reactive or fragmented upgrades.

Project	PR-26-012 Ross Family Complex Accessible Entrance Replacement				
Department	Parks, Recreation and Culture				
Version	Budget Deliberations	Year	2026		

Description Project Description

Replacement of accessible entrance door system and associated hardware.

Project Justification

The current automated accessible entry system is original to the facility and has exceeded its expected service life. In recent years, the system has experienced repeated malfunctions, diminished reliability, and rising maintenance costs. Importantly, performance inconsistencies increase the likelihood of barriers for residents who depend most on the system to enter the facility safely and independently. As a municipal facility, it is a core responsibility to uphold universal design and ensure equitable access. A modern accessible entry system directly supports the municipality's accessibility commitments, compliance with legislation such as the Accessibility for Ontarians with Disabilities Act (AODA) and demonstrates leadership in fostering inclusivity.

Department	Parks, Recreation and Culture			
Version	Budget Deliberations	Year	2026	

Description

Project Description

Mount Albert Lions Community Centre washrooms and kitchen renovation.

Project Justification

The washrooms and kitchen infrastructure are dated, with fixtures, plumbing, and finishes that have exceeded their useful lifespan. Ongoing maintenance demands are increasing.

The existing washrooms do not fully comply with modern accessibility standards, creating barriers for individuals with mobility challenges and undermining inclusivity.

The commercial kitchen, in its current state, does not align with current public health standards for food preparation. Deteriorated surfaces, inefficient ventilation, and outdated equipment elevate risks of non-compliance.

Description

Project Description

Installation of a standby generator at the Mount Albert Lions Community Centre.

Design - 2026

Installation - 2027

Project Justification

Mount Albert Lions Community Centre is in an area that loses power frequently. Automatic back up power is required to continue to provide proper services to those permitting the space for functions, such as wedding receptions.

Department	Parks, Recreation and Culture				
Version	Budget Deliberations Year 2026				

Description

Project Description

To replace existing, outdated lighting fixtures within the facility with energy-efficient LED alternatives. This retrofit is intended to address rising energy costs, reduce ongoing maintenance demands, improve lighting quality for user safety and comfort, and advance the municipality's broader sustainability commitments

Project Justification

Retrofitting the facility's lighting to LED fixtures represents a fiscally responsible, environmentally sustainable, and community-focused investment. The project offers measurable financial benefits in reduced energy and maintenance costs, enhances the experience and safety of all facility users, and underscores the municipality's commitment to environmental responsibility. This initiative is both a practical improvement to a valued community asset and a strategic step in meeting broader municipal objectives.

Project	PR-26-017 Civic Centre Atrium Skylight Repairs			
Department	Parks, Recreation and Culture			
Version	Budget Deliberations	Year	2026	

Description

Project Description

Repairs and replacement to the aluminum double glazed skylight windows in the Atrium.

Project Justification

Over time, the skylights have experienced significant deterioration. This is consistent with the expected service life of aluminum-framed glazing systems, which typically ranges from 20–30 years, depending on exposure and maintenance. Recent inspections have identified a range of concerns, including frame corrosion, sealant failure, visible drafts, water penetration during inclement weather, and reduced thermal performance.

The repair or replacement of the deteriorated skylight windows is a necessary capital investment to protect the Civic Centre from further damage and improve operational efficiency.

Version	Budget Deliberations	Year	2026				

Description Project Description Replace the rubber flooring in the main lobby and East Pad changerooms and hallway. Project Justification The existing rubber flooring is approaching the end of its serviceable life, with evident wear, deterioration, and safety risks. Accordingly, replacement of the flooring is both a practical and a preventative investment. It will address current safety concerns, prevent escalating maintenance costs, and ensure that the Sports Complex continues to serve as a safe, accessible, and welcoming facility for all residents.

Project Department PR-26-019 Sports Complex Accessibility Renovation - CSRIF

Parks, Recreation and Culture

Version

Budget Deliberations Year 2026

Description

Project Description

Accessibility modifications and upgrades at the EG Sports Complex, as identified in the CSRIF grant application. Planned in four phases, the following features will be rebuilt or constructed to improve accessibility:

Phase One: Washrooms, showers, change rooms, and elevators

Phase Two: Universal washrooms, internal ramps and stairs, and service counters

Phase Three: Internal doorways, building entrances, and corridors Phase Four: Signage, wayfinding, and directory/information area.

Project Justification

As identified in the 2024 accessibility assessment of the Sports Complex, improvements to the built environment for inclusivity for all patrons and staff is recommended. This will help to achieve the Rich Hansen Foundation (RHF) Certified designation of the facility. A condition of the approved funding from the Canadian Sport, Recreation and Infrastructure Fund (CSRIF), was for the Town to match approx. 50% of the total requested application amount.

Description Project Description Replace the 50HP motor and associated parts in the East Pad ice refrigeration plant room. Project Justification The current motor has exceeded its expected service life and now presents concerns in terms of reliability, safety, energy efficiency, and maintenance demands. The investment protects a critical municipal asset, reduces risks of operational disruption, improves energy performance, and demonstrates the municipality's commitment to

responsible stewardship of its recreational infrastructure.

Description

Project Description

Create two storage areas for equipment and supplies. One at the end of the Canada Hall corridor, and one between the ice pads at the rear of the building. Design and permits will be required.

Project Justification

The current storage of equipment and supplies poses a safety risk as they are in public accessible areas. Creating dedicated storage areas will reduce potential health and safety incidents, and allow staff to safely store items in a secure location.

Project	CI-24-008 Yonge Street Road Widening & Old Yonge Street Rehabilitation				
Department	Engineering and Public Works				
Version	Budget Deliberations	Year	2026		

Description

Project Description

This budget top up provides additional funding for the Town share of the Yonge Street Widening project which is being constructed by York Region. The Region is widening Yonge Street from Green Lane south into the Town of Newmarket and the additional funding is to account for the awarded contract pricing for sidewalk, mid-block streetlight LED upgrades, as well as, repairs to existing Town storm sewers.

Project Justification

This regional project provides the Town with a significant benefit to the community from a sidewalk connectivity and safety perspective. The Old Yonge Street rehabilitation provides an upgraded hot mix asphalt road surface in partnership with the Region of York as part of their repair works relating to the Yonge Street retaining wall project.

Department	Engineering and Public Works			
Version	Rudget Deliberations	Voar	2026	

Description

Project Description

Bridge 108, located on Doane Road between Kennedy Road and McCowan Road, requires rehabilitation or replacement. This project will complete the detailed design necessary for future construction.

Project Justification

Advancing the design work now ensures the Town is prepared to proceed with future construction. Completing this design phase will reduce future project delays, improve cost certainty, and support the long-term safety and reliability of the road network.

Engineering and Public Works

Budget Deliberations

2026

Description

Year

Project Description

Work includes: purchasing a radar speed board and/or camera, Town wide inspection/replacement of roadside regulatory and warning traffic signs, Automated Speed Enforcement (ASE) program, additional works related to the installation of a pedestrian crossover on Centre Street at the Vivian Creek Park entrance and other traffic related studies and programs in support of the Town's Safer Streets Program.

Project Justification

- 1. To meet the demands of a growing community and support the Town's Safer Streets Initiatives.
- 2. Pursuant to Ontario Regulation 239/02, Minimum Maintenance Standards for Municipal Highways, regulatory signs or warning signs are to be checked for retro-reflectivity annually . Signs that do not pass are replaced as part of this program.
- 3. Implement new initiatives such as safety programs, pedestrian crossovers, pavement markings, education and safety campaigns, etc.

Project	EP-26-005 Stormwater Rehabilita	ition Prograr	n	
Department	Engineering and Public Works			
Version	Budget Deliberations	Year	2026	1

Description

Project Description

Following the detailed inspections of the Town's network of Stormponds in partnership with the LSRCA, staff have identified a number of deficiencies that require repair in order to maintain pond function and safety. This broad maintenance project will ensure the pond infrastructure is maintained in a state of good repair.

Project Justification

LSRCA and Town assessments to-date have identified a number of minor deficiencies that require prompt attention including; fence repairs, headwall and outfall rehabilitation. This work will ensure that this stormwater infrastucture will continue to perform as designed within the urban boundary.

Project	EP-26-006 Mount Albert Storm Outfalls - Construction
Department	Engineering and Public Works

_ ...

Budget Deliberations

Description

2026

Project Description

Version

Within Vivian Creek Park in the community of Mount Albert, there are four storm sewer outfalls and one span of trail in need of repair. Although the infrastructure remains functional, they require replacement. This budget is funding the construction, geotechnical and contract administration for the four storm sewer outfalls.

Year

The ongoing detailed design is expected to be complete in early 2026 and the construction for the trail restoration will be funded through a future PRC budget.

Project Justification

This work is required to maintain and build upon the Town's investment in infrastructure. The outfalls will require repairs to restore the area and function as intended.

EP-26-007 Operations Centre Fuel System Upgrade

Engineering and Public Works

Version E

Budget Deliberations Year 2026

Description

Project Description

Replacement of the existing electronic fuel control system at the Operations Centre and it's individual fuel access keys. This system provides enhanced security of all fuel transactions and provides detailed fuel reconciliation for all Town departments 24/7.

Project Justification

The current electronic fuel system was re-located from the old Works Yard and moved to the Operations Centre. It is approximately 25 years old and no longer has vendor support or repair components/parts available due to its age.

This system provides essential security and transaction tracking for all fuel dispensing at the Operations Centre and is required to perform 24/7 without interruption. It is well beyond it's lifecycle and requires replacement.

Project Department EP-26-008 2020 Silverado Patrol Truck (R20-14) Replacement

Department Engineering and Public Works

Version Budget Deliberations

2026

Description

Year

Project Description

Replacement of the Roads Patrol Truck. This 3/4T work truck is used extensively over the winter months performing 24/7 road patrolling with a plow and sanding unit. During the summer months is highly used to support maintenance activities.

This asset is due for replacement based on it's 5 year replacement cycle due to high utilization.

Project Justification

Current Mileage: 248,000 (August/25)

Current Engine Hours: 8,300 (equivalent to 490,000 km of wear an an engine based on severe duty)

In Service Date: Dec/20 Lifecycle: 5 years (2026)

This unit is expected to drive an additional 75,000 km before replacement and is typically used through the winter to patrol and treat roads in advance of full operations and in lone worker overnight situations requiring mechanical reliability. Following best management practice, this unit will be retained as a spare unit for 1 season given it's critical winter function.

EP-26-009 2016 Freightliner Plow/Dump (Viking Plow Equip't) (R16-04) Replacement

Engineering and Public Works

Version

Budget Deliberations Year 2026

Description

Project Description

Replacement of a single axle combination snowplow (R16-04) following a complete mechanical inspection. This truck is used exclusively for urbanized winter maintenance and seasonal construction activities. This is a critical asset in the Town's winter operational fleet.

Project Justification

This single axle combination snowplow is critical to providing continuous winter maintenance in compliance with Provincial Minimum Maintenance Standards. This unit is approaching the end of its 10 year useful service life and is scheduled for replacement in 2026. Given current production timelines of approximately 20-24 months following order, it is prudent to commence the replacement to ensure continued uninterrupted service delivery.

Following best practices, this unit will be retained as a spare unit unit the next single axle plow truck is replaced. Current mileage: 106,000 km (Aug/25), Engine Hours: 6,000 hrs, equiv to 180,000 km.

Project	WW-26-001 Water Rehabilitation Pr	rogram		
Department	Water and Wastewater			
Version	Rudget Deliberations	Voar	2026	

Description

Project Description

This budget is providing funding for the following:

- Additional funding for the design and installation of hydrants in strategic locations across Town to support
 the Water System Network Improvements project (WW-24-002), the construction of watermain
 replacements in Sharon through the Water Rehabilitation Program (WW-25-002) and extend the
 watermain replacements in Sharon to include Mount Albert Rd from approx. Charles St to William St. This
 work includes additional contract administration, inspections and geotechnical services.
- Funding for the investigation and detailed design of a watermain replacement in Holland Landing along Mount Albert Rd from approx. Yonge St to 225m east of Grist Mill Rd, in coordination with York Region and their planned projects.
- Bulk fill station upgrades, hydrant painting and rehabilitation/replacement of water infrastructure as required (hydrants, valves, sample stations, and other appurtenances).

Project Justification

These works will strengthen the Town's water distribution network, improve resiliency, contribute to regulatory compliance, and support the delivery of safe, reliable water services.

Version	Budget Deliberations	Year	2026		

Description

Project Description

Consultant services to evaluate of the Town's linear wastewater system, based on CCTV inspections, and inform the asset management prioritization model. Construction funding has been allocated to address any minor, urgent deficiencies.

Project Justification

Capital funding to support strategic oversight of the Town's linear wastewater infrastructure. This assessment work informs the prioritization of future repairs, re-lining, and maintenance activities within the sanitary system, based on identified structural or operational deficiencies. The goals are to preserve service levels and to maintain the system in a good state of repair as per the regulatory framework. Any unused funds will be returned to reserves.
