

As Canada's fastest growing municipality (based on 2021 Census data), the Town of East Gwillimbury is located along Highway 404 in northern York Region and is as a premier center for growth within the GTA. We are proud of our award-winning focus on modernization, innovation, and creativity. Those joining Team EG will use that lens to help shape our growing community. As an Employee Recommended Workplace, employees enjoy a number of benefits including; competitive wages, employee assistance program, social and wellness committees, access to outdoor seating areas and numerous trails which allow you to enjoy the beauty of EG while at work. Come join our team and see the EG difference!

Key Responsibilities:

Under the direction of the Town's Information Management Lead, the GIS Technologist will be responsible for the Town's core GIS data, focused on maintaining existing data while creating new data as determined by project and operational priorities. The role includes leading GIS data editing/transformation projects, analyzing and visualizing data to provide insight to various levels of staff, developing ETL tools for the ongoing support of Corporate Data and Information Management, publishing web-based GIS products, and supporting the broader Information Management practices at the Town.

Qualifications and Requirements:

- University degree in Geography, Computer Information Systems, Computer Engineering, or related discipline.
- One year post graduate diploma in GIS, or equivalent experience and accredited certificate in GIS.
- One year experience developing, supporting, and managing GIS data and solutions.
- Experience with ETL solutions (FME) is desired.
- Excellent knowledge of spatial data creation techniques, data and spatial product delivery design and production.
- Excellent interpersonal, time management, communication, presentation, problem-solving, and troubleshooting skills.
- Ability to work collaboratively, forming working relationships with both internal and external groups.
- Experience developing, documenting, and maintaining technical/operational processes.
- Knowledge of Project Management principles, concepts, practices, tools, techniques, and methods.
- Experience leading projects and/or teams.
- In addition to GIS skills, computer literacy utilizing the Microsoft suite of products including M365, SharePoint Online, Power BI, Power Automate, and SQL Server is desired.

Salary Range: \$75,457 - \$88,779 annually
