Executive Summary

A review of the Town of East Gwillimbury's Register of Cultural Heritage Properties (Heritage Register) was undertaken between Fall 2019 and Winter 2021. The objective of the review was to strengthen the Heritage Register through a process of clarifying the rationale for properties included as non-designated (listed) properties and to confirm the cultural heritage value of the properties on the Heritage Register.

To ensure an effective and consistent approach the project was conducted in three phases. Phase 1 began with background historical research and development of methodology and tools to apply in the evaluation process. Phase 2 consisted of a review of the existing Heritage Register and an evaluation of properties using the tools developed. Phase 3 consisted of the development of recommendations and project reporting.

The tools developed in Phase 1 and applied in Phase 2 of the review are rooted in Ontario Regulation 9/06 (O. Reg. 9/06) and consider potential design or physical, historical or associative, or contextual values. The evaluation tools consisted of the development of a historical thematic framework, a field survey review of properties from the public right-of-way and creation of historical context statements. These specifically address the properties on the existing Heritage Register, but can be expanded upon in future to address properties within the Town and not currently on the Heritage Register.

A screening process was implemented ahead of the Phase 2 evaluations. The screening process determined 8 properties had insufficient material integrity to demonstrate its potential or known cultural heritage value. The screening process also identified 39 properties which would not be subject to evaluation and are recommended to remain on the Heritage Register. These properties consist of properties designated under Part

IV of the *Ontario Heritage Act (OHA)*, property associated with the Sharon Temple National Historic Site, cemeteries and properties which have recently been denied a removal request by the Heritage Advisory Council and/or Town Council. The screening process also identified 53 properties which were not visible from the public right-of-way. As the existing conditions of these properties could not be assessed due to limited or lack of visibility from the public right-of-way, these properties were screened and evaluated using property photographs provided by the Town.

Historical context statements were developed based on the historical thematic framework and O. Reg. 9/06 and organized by geographical areas, building type and/or period. Properties were then evaluated against the relevant historical context statements. The evaluation resulted in the identification of properties which are not recommended for removal from the Heritage Register at this time as these properties:

- Reflect important themes in the Town's growth and development as expressed in the historical context statements.
- Meet the eligibility standards embedded in its associated theme.
- Have character-defining/associative features that directly relate to the potential or known heritage value of its associated theme and building type.
- Meet the integrity considerations correlated to its associated theme.

Further properties were identified as being valued by the community through consultation activities held between July 2020 and February 2021, with the public, the Heritage Advisory Committee and Council. These properties have been retained on the Heritage Register.

The review has resulted in the following recommendations:

- ♦ Update the information of properties remaining on the Heritage Register to include standardized data, related historical context statement, and values (Appendix D)
- ♦ The Village of Mount Albert should be prioritized for a Heritage Conservation District study to determine if the area merits designation under Part V of the *OHA*. It is strongly recommended that properties within Mount Albert remain on the Heritage Register until such time a Heritage Conservation District Study has been undertaken.
- ♦ The following properties should be prioritized for further study for potential designation under Part IV of the *OHA*:
 - 6 Alice Street (ID 58)
 - 19127 Centre Street (ID 62)
 - 19139 Centre Street (ID 82)
 - 31 Main Street (ID 104)
 - 48 Main Street (ID 112)
 - 5623 Mount Albert Road (ID 134)
 - 19180 Yonge Street (ID 37)
 - 19188 Yonge Street (ID 30)
 - 19911 Yonge Street (ID 28)
 - 20317 Leslie Street (ID 179)
 - 20366 Leslie Street (ID 149)
 - 20453 Leslie Street (ID 170)
 - 20463 Leslie Street (ID 189)
 - 18532 Leslie Street (ID 420)
 - 18794 Leslie Street (ID 415)
 - 18922 Leslie Street (ID 421)
 - 5551 Ravenshoe Road (ID 2)
 - 2624 Boag Road (ID 204)
 - 22741 Catering Road (ID 216)
 - 21388 Highway 48 (ID 266)
 - 21689 Kennedy Road (ID 273)
 - 21711 Kennedy Road (ID 272)
 - 21711 Kennedy Road (ID 318)
- ♦ The initial screening process of the properties on the current Heritage Register identified some instances where the wrong property was potentially listed on the register. In these cases, the address listed on the register does not match the property description and/or property image provided by the Town (see Appendix B, properties marked with an asterisk*). Council should consider the removal of these properties from the Heritage Register and consider listing the intended properties as described in Appendix B.
- ♦ The evaluation process identified four instances where properties should be entered or further researched to verify the information on file about the property (Appendix B). These properties are 1527 Queensville Sideroad (ID 192), 18447 Centre Street (ID 221), 18838 Leslie Street (ID 413), and 18846 Leslie Street (ID 414). For these properties, it is recommended that a Cultural Heritage Evaluation Report be conducted to determine whether the property should remain on the Heritage Register or be considered for removal for lacking significance.
- ♦ There are minor data inconsistencies in the roll numbers provided by the Town. It is recommended that the Town combine any differing information from duplicate records into one "listing" and remove the duplicate from the list of properties on the Heritage Register.

1.0 Introduction

The Town of East Gwillimbury retained Archaeological Services Inc. (ASI) to undertake a Heritage Register Review of the Town’s existing municipal Register of Cultural Heritage Properties (Heritage Register), which includes designated and non-designated properties (commonly referred to as Listed). The purpose of the review is to determine which properties currently included on the Heritage Register should remain as non-designated properties, which properties should be prioritized for designation under the *Ontario Heritage Act (OHA)*, and which properties should be considered for removal from the Heritage Register.

The project was undertaken to help make the Town’s Heritage Register more manageable and reflective of the properties that have significant heritage value and should be conserved for the enjoyment of future generations. The Heritage Advisory Committee raised the need for the project following numerous removal requests for properties that were on the Register but did not have heritage value. In 2019, there were over 30 removal requests with the vast majority of them being approved due to properties not having significant heritage value to remain on the Heritage Register. The Heritage Register Review

project has allowed for a comprehensive review to be done for all of the properties on the Town’s Heritage Register so that the Heritage Advisory Committee does not need to continually process removal requests, allowing the Committee to focus efforts more on heritage education, outreach, designation, and other community cultural events for the Town. Making the Heritage Register more manageable allows for a greater appreciation of the properties that remain on the Register as being truly significant to the Town and its history (email communication Adam Robb, February 10, 2020).

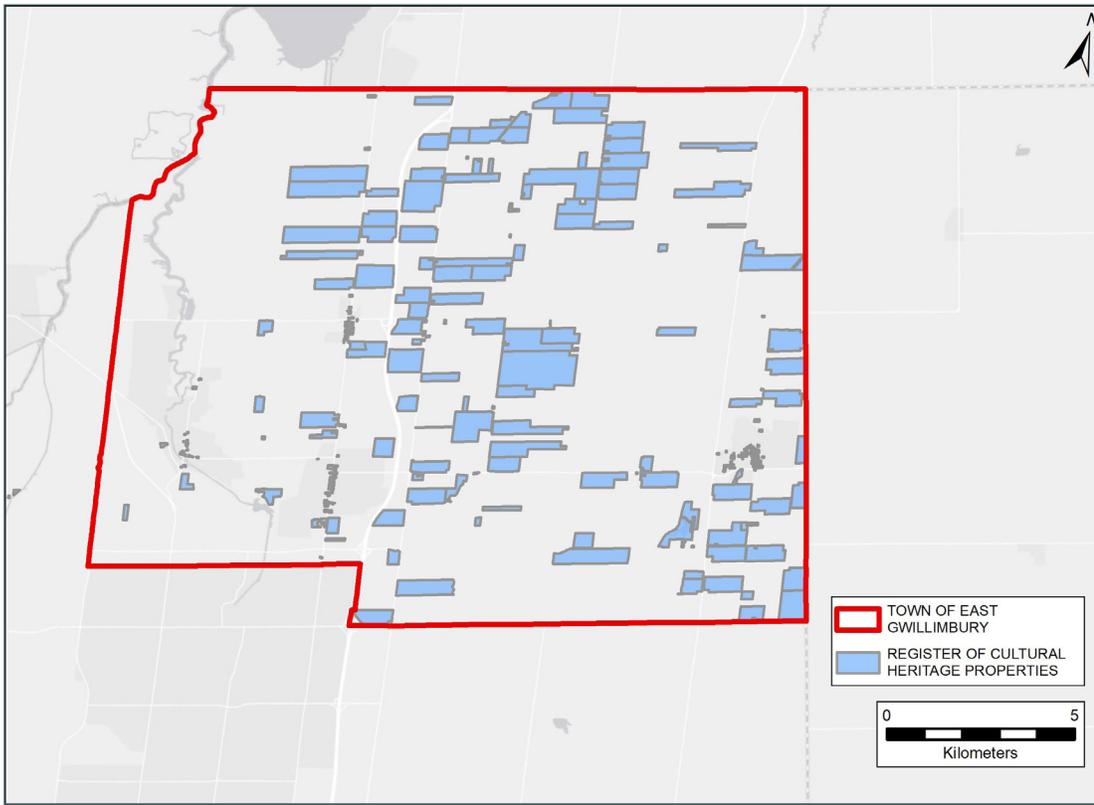

The review will help to refine an understanding of the places in East Gwillimbury that reflect the Town’s history and are important to the community, providing another step to ensuring that these places are managed and maintained into the future.

The project was undertaken in three phases between Fall 2019 and Winter 2021: 1) background research and development of methodology; 2) review of existing Heritage Register and property evaluation; and 3) recommendations and reporting.

Figure 1: The project was conducted in three phases between Fall 2019 and Winter 2021.

Map 1: Study area showing properties on the Heritage Register as of August 13, 2019.

1.1 Study Area

The Town of East Gwillimbury is located in the Regional Municipality of York. East Gwillimbury is bounded by Ravenshoe Road to the north, East Townline Road to the east, Davis Drive and Green Lane East to the south, and Bathurst Street at the west. The Town is bisected by Highway 404 which carries north-south traffic between Toronto and the northern end of the Highway at Woodbine Avenue just south of Ravenshoe Road. The Town is primarily rural agricultural lands and includes four community areas: Holland Landing; Queensville; Sharon; and Mount Albert as well

as several hamlets. A major natural feature which defines the Town is the East Holland River. The Town of East Gwillimbury was formed in 1971 by the amalgamation of the Township of East Gwillimbury with all the previously incorporated villages and hamlets within the Township. The 2016 population of East Gwillimbury was 23,991 with growth projections anticipating the population to grow to 86,500 by 2031.

While the study area includes the whole of the Town of East Gwillimbury, only properties on the Heritage Register as of August 13, 2019 were included in this Heritage Register Review.

2.0 Policy Context

2.1 Ontario Heritage Act

The *OHA* (Ministry of Tourism, Culture and Sport 2017; now administered by the Ministry of Heritage, Sport, Tourism and Culture Industries) gives the Ministry of Heritage, Sport, Tourism and Culture Industries (MHSTCI) the responsibility for the conservation, protection, and preservation of Ontario's cultural heritage resources. The MHSTCI is charged under Section 2.0 of the *OHA* with the responsibility to determine policies, priorities, and programs for the conservation, protection, and preservation of the heritage of Ontario. Section 27 of the *OHA* requires the clerk of every municipality to keep a publicly accessible register of properties that are of cultural heritage value or interest situated in the municipality. The municipal register of heritage properties must include all properties in the municipality that are designated under Part IV and Part V of the *OHA*. The *OHA* also allows a municipality to include properties of cultural heritage value or interest that have not been designated in its municipal register, sometimes referred to as listing.

The *OHA* sets out criteria for determining cultural heritage value under Ontario Regulation 9/06 (O. Reg. 9/06):

(2) A property may be designated under section 29 of the Act if it meets one or more of the following criteria for determining whether it is of cultural heritage value or interest:

1. The property has design value or physical value because it,

- i. is a rare, unique, representative or early example of a style, type, expression, material or construction method,
- ii. displays a high degree of craftsmanship or artistic merit, or
- iii. demonstrates a high degree of technical or scientific achievement.

2. The property has historical value or associative value because it,

- i. has direct associations with a theme, event, belief, person, activity, organization or institution that is significant to a community,
- ii. yields, or has the potential to yield, information that contributes to an understanding of a community or culture, or
- iii. demonstrates or reflects the work or ideas of an architect, artist, builder, designer or theorist who is significant to a community.

3. The property has contextual value because it,

- i. is important in defining, maintaining or supporting the character of an area,
- ii. is physically, functionally, visually or historically linked to its surroundings, or
- iii. is a landmark. O. Reg. 9/06, s. 1 (2) (Ministry of Heritage, Sport, Tourism and Culture Industries 2017)

2.2 Town of East Gwillimbury Official Plan

Heritage

Section 6.0 of The Town of East Gwillimbury Official Plan addresses the protection of cultural heritage. The policies provide the framework and mechanisms to ensure the preservation of the Town's history. Heritage resources include a broad range of structures, sites, environments, artifacts and traditions.

Section 6.2 addresses Built Heritage stating the primary objectives are retention, integration and adaptive reuse of heritage resources while insensitive alteration, removal and demolition are to be avoided.

Section 6.2.1 states,

The Town shall compile a Register of Cultural Heritage Resources that includes designated heritage resources and may also include those listed as being of significant cultural heritage value or interest including built heritage resources, cultural heritage landscapes, heritage conservation districts, areas with cultural heritage character and

heritage cemeteries.

Section 6.2.2 states,

The Register shall contain documentation for these resources including legal description, owner information, and description of the heritage attributes and cultural heritage value for each designated and listed heritage resource. The Register shall be updated regularly and readily accessible to the public to ensure effective protection and to maintain its currency.

Of note, Section 6.6 states that all cemeteries of cultural heritage significance shall be designated under Part IV or V of the *OHA*. The Official Plan also sets forth policies for the protection of areas as Heritage Conservation Districts, Cultural Heritage Landscapes and Areas of Cultural Heritage Character. Both Heritage Conservation Districts and Cultural Heritage Landscapes can be protected under the *OHA* and are to be maintained on the Town's Register of Cultural Heritage Resources while Areas of Cultural Heritage Character are established through Secondary Plans, Community Design Plans or a Zoning By-Law and protected through land use and development design guidelines.

3.0 Community Engagement

Community Engagement for the Heritage Register Review project was conducted at the Community Open House held on October 8, 2019. The purpose of the Community Open House was for community members to learn about a broad range of the Town's programs and services. The project team attended and provided information on the goals and objectives of the Heritage Register Review project and the purpose of municipal Heritage Registers generally. The community was also asked to participate in the project by identifying properties or buildings that are important in telling the story of East Gwillimbury. Four community members provided feedback during the event. Additionally, the Town conducted a Virtual Open House beginning June 29, 2020, providing the opportunity for community members to provide feedback on the summary of property recommendations. The commenting period closed on July 10, 2020.

3.1 Heritage Advisory Committee

The Heritage Advisory Committee participated in the process through providing feedback on draft recommendations. The consultant team presented at the June 18, 2020 Heritage Advisory Committee meeting and Town Staff presented at the October 15, 2020 meeting. Feedback provided focused on properties which the Heritage Advisory Committee advised should remain on the Heritage Register. Specific rationale or cultural

heritage values for these properties were not provided to the consultant team. These properties are provided in Table 1.

3.2 Town Council

The project was presented to Town Council on November 17, 2020. Council deferred adoption of the updated Heritage Register directing staff to schedule a workshop for Council in Q1 of 2021 and to conduct further public outreach. Town Staff subsequently mailed notices to property owners of properties recommended for removal from the Heritage Register. This provided an opportunity for these property owners to express if they wished their property to remain on the Heritage Register. At that time, the owner of 20375 McCowan Road responded with their desire for their property to remain on the Heritage Register.

The project was presented to Town Council for a second time on February 9, 2021 as part of the requested workshop. Town Council adopted the updated Heritage Register based on Development Services Report P2021-06 with Council amendments on February 9, 2021. One of the amendments detailed a list of 51 properties¹ which were brought forward by Heritage Advisory Committee Council Liaisons to remain on the Heritage Register. These properties are provided in Table 2.

¹ Table 2 contains 50 properties because one property included in the amendment, 19488 McCowan Road, is not on the Heritage Register. Note the amendment originally stated 18288 McCowan Road however should have read 18388 McCowan Road.

3.3 Frequently Asked Questions

This section contains the information provided to the community at the October 8, 2019 Community Open House. This material is based on information provided to the community of East Gwillimbury in the general information pamphlet, "Preserving our Heritage: Register of Cultural Heritage Properties".²

What is a Municipal Heritage Register?

Every municipality in Ontario is required, under Section 27 of the *OHA*, to maintain a register of properties that are of cultural heritage value or interest in the community. The municipal Heritage Register must include all properties in the municipality that are designated under Part IV or Part V of the *OHA*.

The *OHA* also enables municipalities to include properties that are not designated, but that Council believes to have cultural heritage value or interest. These are referred to as non-designated or "listed" properties.

How are properties identified for inclusion on the Heritage Register?

Non-designated properties considered for listing on a Heritage Register are typically reviewed using a set of criteria contained in regulations made under the *OHA*. In many municipalities, a property listed on a Heritage Register is deemed to sufficiently satisfy one or more on the criteria in the following categories:

- Design or Physical Value
- Historical or Associative Value
- Contextual Value

What are the benefits of a Heritage Register?

- Recognizes properties of cultural heritage value in a community;
- Fosters civic identity and pride by drawing attention to the heritage and development of the community;
- Promotes knowledge and enhances an understanding of a community's cultural heritage;
- Provides easily accessible information about cultural heritage value for land-use planners, property owners, developers, the tourism industry, educators and the general public; and
- Is a key element of a municipal cultural plan that begins with mapping local cultural resources and then leverages these resources for economic development and community building purposes.

Does being listed on a Heritage Register automatically result in future designation?

No. Listing is the first step in the identification and evaluation of a property that may warrant further detailed research and formal designation under Part IV of the *OHA*. It is the first step; however, this does not mean that all properties included in the Register would be considered appropriate candidates for designation. It does provide for opportunities to cooperatively work with property owners to promote or encourage the design of additions or proposed renovations to buildings and structures to maintain or enhance historic elements.

¹ Pamphlet can be accessed at: <http://www.eastgwillimbury.ca/Assets/1+2015+About+Us/01+About+the+Town/0.4+Heritage/Info+Pamphlet.pdf>

Can properties that are listed on the Heritage Register be altered, renovated or modified?

When an owner of a listed property proposes a renovation, addition, or alteration of a structure and a building permit is required, a separate review by the heritage advisor/heritage committee and staff is required. This review includes discussions with the property owner about what is proposed and possibly some changes which would make the project sensitive to the heritage character of the existing building.

Does listing on a Heritage Register affect property values?

No. Listing a property on a Heritage Register should not impact its real estate value.

Does listing on a Heritage Register affect property insurance rates?

No. Listing a property on a Heritage Register does not affect the cost of property insurance. Older properties in general may have higher insurance rates, but listing a property would not change this.

What is the difference between designated properties and listed properties?

Designated Property

- A designated property is regulated by a municipal by-law registered on title.
- The Town has up to 90 days to review a demolition permit and make a decision to approve, approve with conditions, or refuse the permit (subject to property owner appeal).
- A heritage permit is required for alterations that may affect the designated property's heritage attributes.

Listed Property

- No legal documents are registered on the title of a listed property.
- The Town has up to 60 days to review a demolition permit and consider options for preservation. If a decision is not made within 60 days, the demolition permit is approved.
- A heritage permit is not required for alterations that may affect the listed property's heritage attributes. A building permit requires a separate review by the heritage advisor/committee and staff.

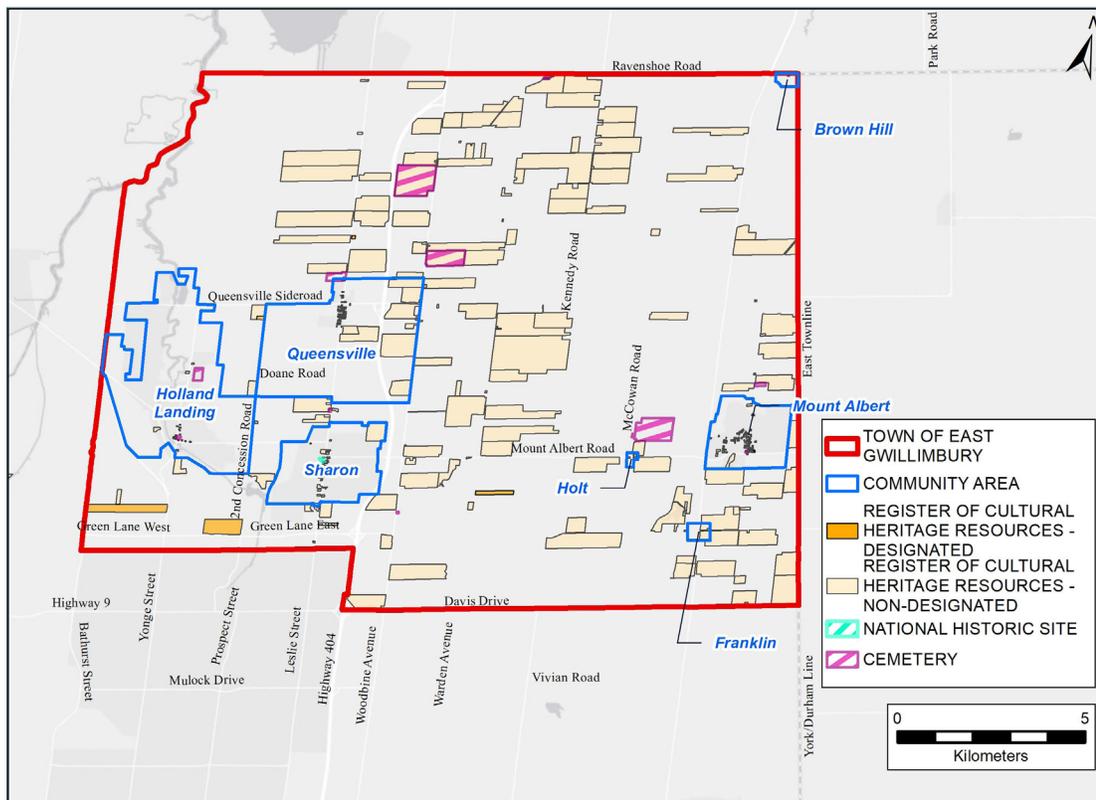

4.0 Town of East Gwillimbury Heritage Register

The existing Heritage Register in the Town of East Gwillimbury has 463 entries. Of these entries, 12 are designated under Part IV of the *OHA*, seven are part of Sharon Temple National Historic Site and 15 are recorded as cemeteries or burying grounds (this number is not inclusive of two cemeteries or burying grounds that are Part IV designated, which are accounted for in the "designated" figure). The non-designated properties on the Heritage Register are found in the following locations:

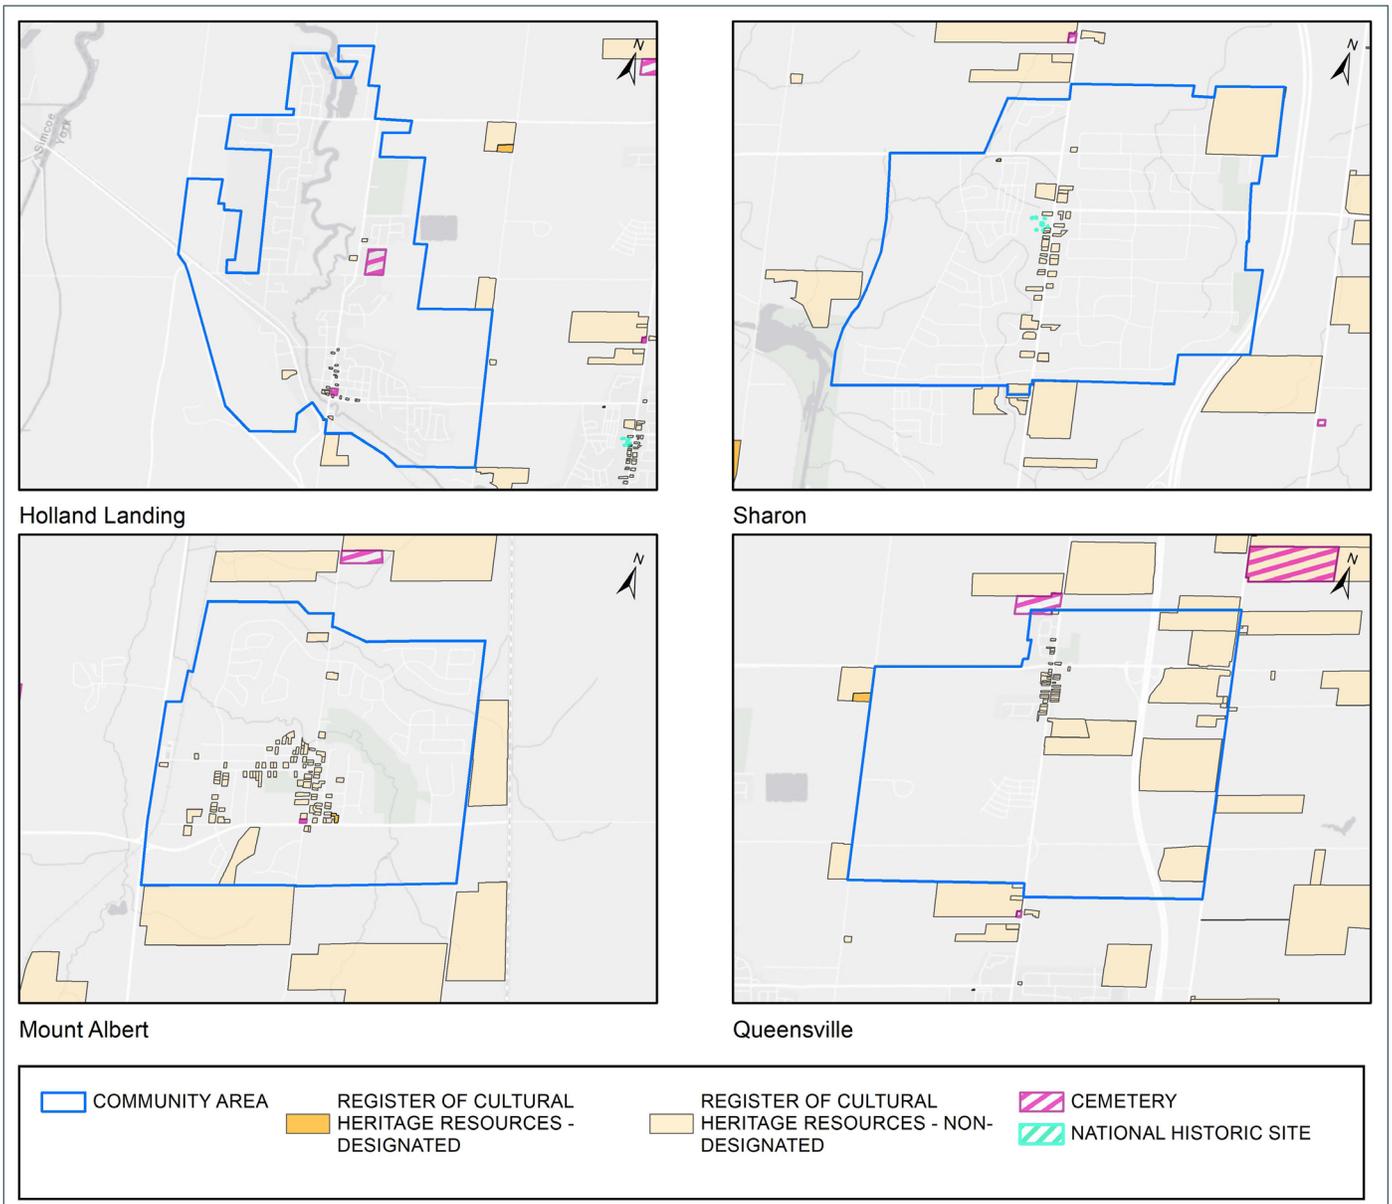

- Rural: 210 properties
- Sharon: 46 properties

The properties on the Heritage Register are generally distributed throughout the Town however 23% (108) of the properties are located on Leslie Street and 10% (49) are located on Centre Street.

- Brown Hill: 3 properties
- Franklin: 6 properties
- Holland Landing: 33 properties
- Holt: 5 properties
- Mount Albert: 99 properties
- Queensville: 49 properties

Map 2: Heritage Register detailing designated and non-designated properties, National Historic Site and cemeteries.

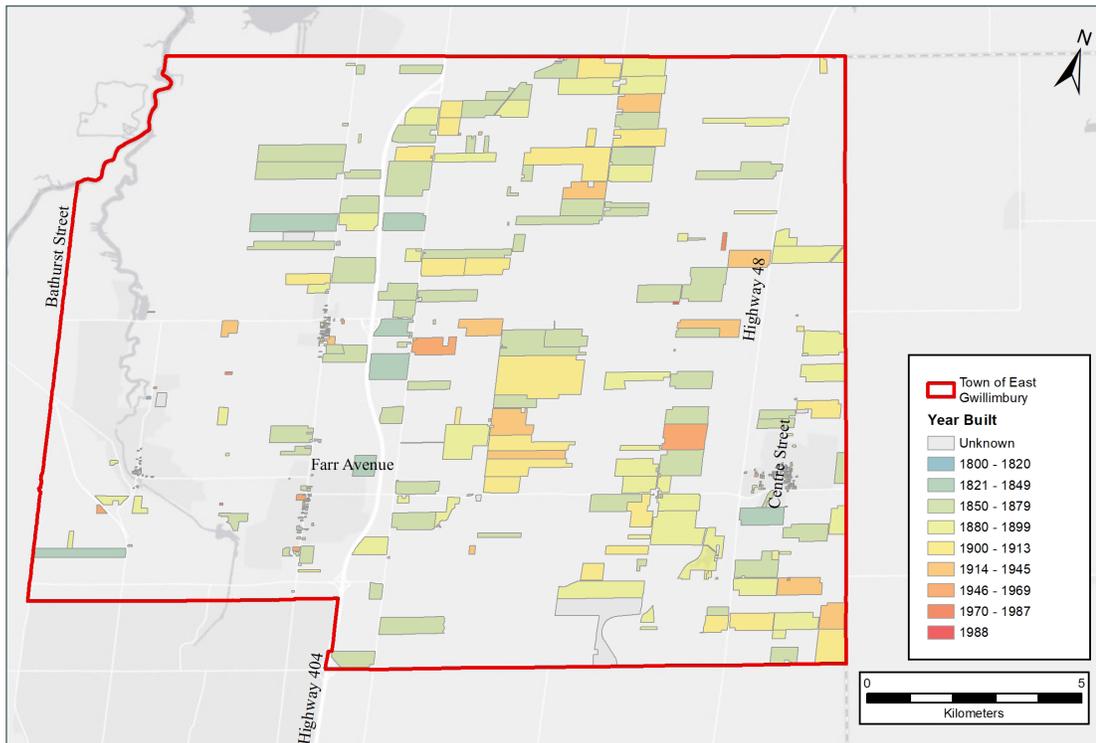

Map 3: Heritage Register detailing designated and non-designated properties, National Historic Site and cemeteries within Community Areas.

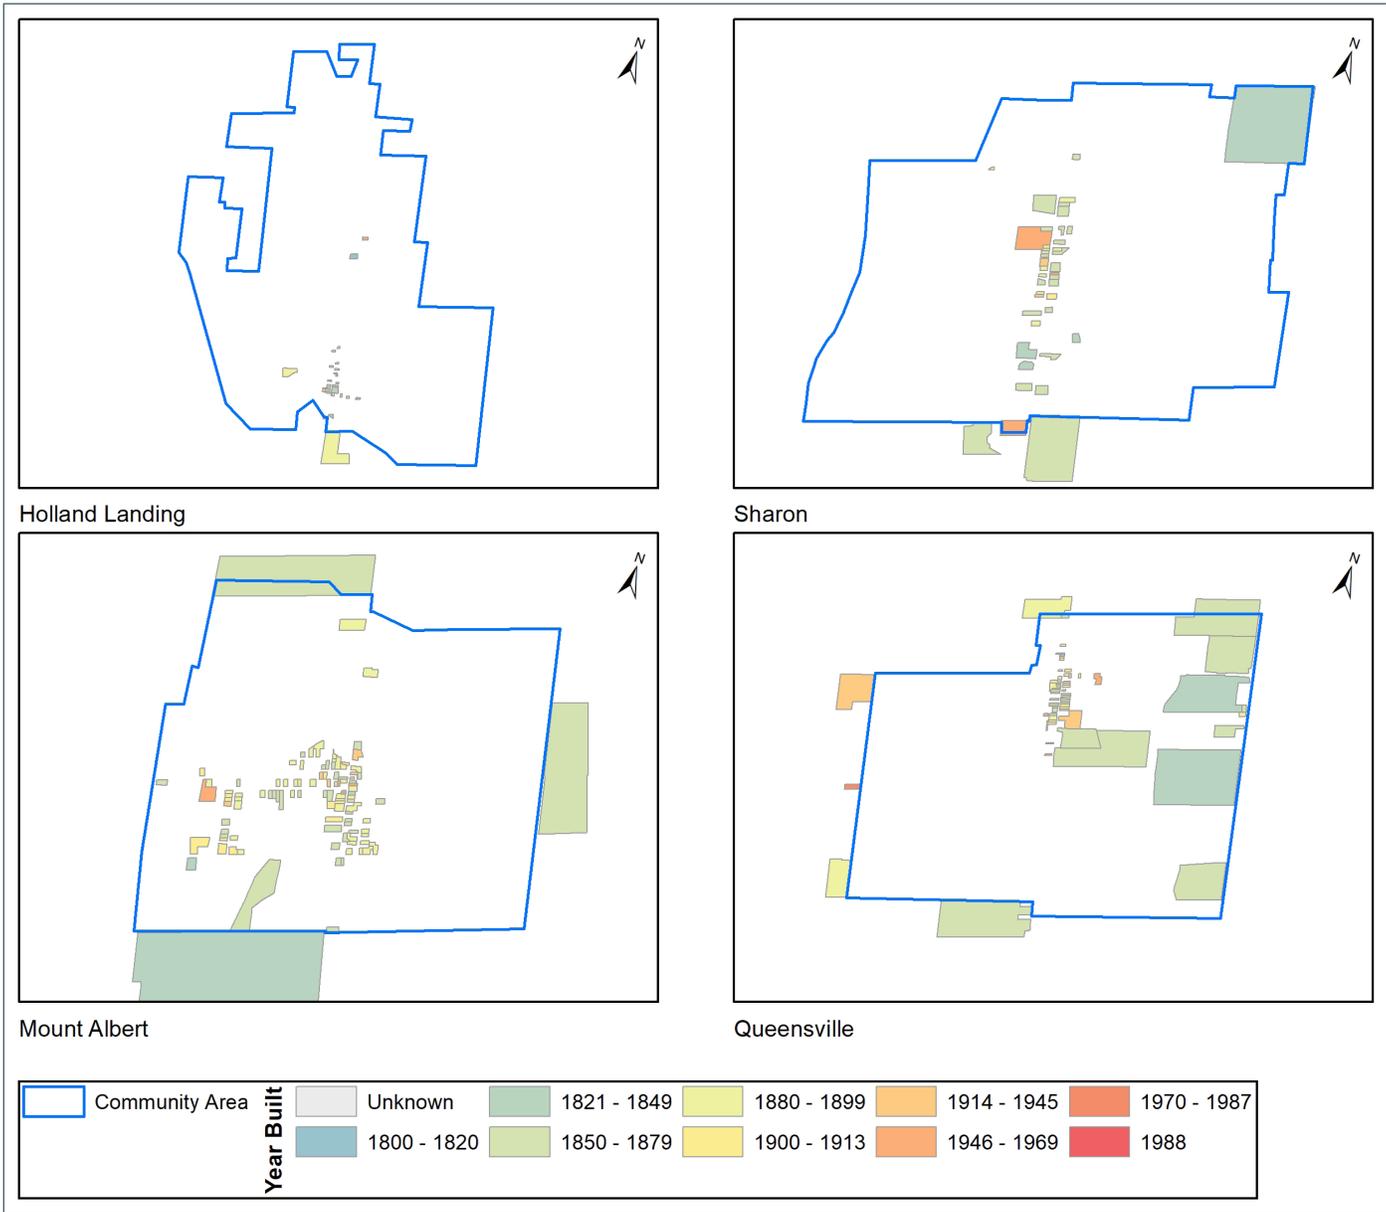

4.1 Property Age

It is important to understand the overall age range of properties currently included on the Heritage Register to make assessments under O. Reg. 9/06 Criteria 1 relating to design or physical value.

The majority of the properties on the Heritage Register date to the mid- to late-nineteenth century with some properties dating to the early and mid-twentieth century. The earliest buildings on the Heritage Register date to circa 1800 and circa 1820s. A majority of these buildings have been moved to the Sharon Temple National Historic Site property from other locations. The most recently constructed property is a residence constructed in 1988 (according to Municipal Property Assessment Corporation (MPAC) data) and located at 20644 McCowan Road.

Map 4: Heritage Register detailing property age.

Map 5: Heritage Register detailing property age within Community Areas.

4.2 Data Standardization

The first step in the review process was a field survey of all properties currently included on the Heritage Register. The primary objective of the field survey was to gather the most up-to-date photo documentation of the property and to confirm and document features of the property. The field survey was conducted from the public right-of-way by ASI staff members on several dates in Fall 2019. A limitation of this survey was that some buildings were not visible. For those properties not visible from the right-of-way, historical and contemporary satellite and aerial imagery as well as photos provided by the Town were used as part of the screening and evaluation process.

All photographs and information were collected in a digital survey form which was pre-populated with the property data collated from several sources provided by the Town. Following the collation of data, MPAC data was used to populate date of construction where it was not otherwise available in the Town's data sources. The information gathered in the field was then reviewed in the office along with historical maps and aerial photography, current ortho imagery and the property information file. In the process, the following fields were standardized:

- ♦ Primary material (cladding)
- ♦ Construction
- ♦ Form (renamed Plan)
- ♦ Height
- ♦ Number of bays
- ♦ Veranda type

Additional fields were collected to supplement the property records:

- ♦ Secondary material, if applicable
- ♦ Entrance Hall
- ♦ Roof type
- ♦ Contemporary addition
- ♦ Barn/outbuilding

- ♦ Current land use
- ♦ Historical context

While architectural style is contained in the data, this data was not standardized during the process. Where architectural style was not indicated for a property or where a property has design value the information was added or refined during the evaluation process to be more accurate.

It should be noted that there are minor data inconsistencies in the roll numbers provided by the Town. The following properties have duplicate records, with duplicate roll numbers. It is recommended that the Town combine any differing information from duplicate records into one "listing" and remove the duplicate from the list of properties on the Heritage Register. Properties that have a duplicate roll numbers that should have information added to its associated record before removal:

- ♦ ID No. 20 – 1954-000-888-615-00 – 110 Peter Street: Combine information with ID No. 21
- ♦ ID No. 215 - 1954-000-068-597-00 – 22711 Catering Road: Combine information with ID No. 218
- ♦ ID No. 284 - 1954-000-026-748-00 – 19488 Leslie Street: Combine information with ID No. 305
- ♦ ID No. 326 - 1954-000-047-319-00 – 19199 McCowan Road: Combine information with ID No. 332
- ♦ ID No. 402 - 1954-000-036-602-00 – 20893 Woodbine Avenue: Combine information with ID No. 376
- ♦ ID No. 378 - 1954-000-038-904-10 – 21774 Woodbine Avenue: Combine information with ID No. 403
- ♦ ID No. 449 - 1954-000-221-089-34 – 30 Maple Way: Combine information with ID

No. 450

Buildings located on the Sharon Temple National Historic Site also all share the same roll number, however, for the purposes of this review, they have been kept as separate records. In addition, there are two records that have incomplete address data, and as a result were not evaluated:

- ♦ ID No. 405 – 1954-000-073-790-50 – 50 [no street name provided] (settler's cabin)
- ♦ ID No. 408 – 1954-000-027-746-10 – 10 [no street name provided]

5.0 Screening and Evaluation Methodology

The evaluation of properties currently on the Heritage Register was conducted in two phases. The first stage, Screening, consisted of a preliminary review of all properties on the current Heritage Register. While the second stage, Evaluation, consisted of a scoped evaluation process.

5.1 Screening Methodology

Recent removals of properties from the Heritage Register have been primarily due to the decreased material integrity of the property or changes to the property to an extent that the character-defining features of the property have been greatly diminished. As such, the screening process was tailored to focus on a review of the current material integrity to determine if a property had sufficient integrity to demonstrate its potential or known cultural heritage value.

Integrity is defined as the authenticity of a historical resource's physical identity evidenced by the remaining characteristics that existed during the resource's period of significance. The integrity of a property is assessed by identifying the significant physical characteristics of a historical resource and evaluating any adverse changes to those characteristics. Physical characteristics that are typically considered significant are those features that create or define an architectural style, materials used, setting, and/or the craftsmanship displayed. A property that retains all or a majority of its significant physical characteristics and has not been impacted by subsequent alteration or change, is considered to have maintained its integrity (Page & Turnbull, Inc. 2010).

Generally, a property that has sufficient integrity will retain a majority of its character-defining features and will retain enough aspects of integrity to convey its significance. Replacement materials may be present so long as they do not affect the overall integrity of design. Similarly, in order for a property to be considered "sufficient", any additions to the primary structure must be subordinate to the overall character of the original building. Increased age and rarity of the property type may also lower the threshold required for sufficient integrity.

Screening determined:

- Properties which are not recommended for removal from the Heritage Register and were not subject to further evaluation.
- Properties which were considered in the second phase, Evaluation.
- Properties which are recommended for potential removal from the Heritage Register.

In addition to reviewing material integrity of built features, the screening process also identified properties that are not recommended for removal from the Heritage Register based on level of heritage protection, type and/or historical associations. It is recommended that properties designated under Part IV of the *OHA*, properties/built structures located on or associated with the Sharon Temple National Historic Site, and currently listed cemeteries remain on the Heritage Register. Finally, properties that have been recently denied a removal request by the Heritage Advisory Committee and/or Town Council should also remain on the Heritage Register. Each property was reviewed against the statements in Table 3 to determine the next course of action.

Table 3: Screening Process

	Property not recommended for removal and will not be subject to further evaluation	Property will be considered in the second phase, Evaluation	Property recommended for removal from the Heritage Register
The property is included on the Heritage Register as a Part IV designated property under the <i>OHA</i> ³	Yes	No	No
The property is included as a non-designated property on the Heritage Register and contains a cemetery	Yes	No	No
The property/building is located on or associated with the Sharon Temple National Historic Site	Yes	No	No
The property is included as a non-designated property on the Heritage Register and the property has sufficient integrity to express the known or potential heritage value or interest of the property	No	Yes	No
The property is included as a non-designated property on the Heritage Register and the property does not have sufficient integrity to express the potential or known heritage value or interest of the property	No	No	Yes
The property is included as a non-designated property on the Heritage Register and is not visible from the right-of-way. Aerial and satellite images, as well as property photos provided by the Town were used as part of the evaluation process	No	Yes	No
The property is a non-designated property on the Heritage Register and is not a 'real' property asset	Yes	No	No
The property (building) has recently been denied a removal request by the Heritage Advisory Committee and/or Town Council	Yes	No	No

³ There are no Part V designated properties in the Town of East Gwillimbury.

5.2 Evaluation Methodology

Properties which proceeded to the second phase, Evaluation, were evaluated against historical context statements (see Appendix A). The historical context statements were developed specifically for the Town of East Gwillimbury based on the research and findings of the historical thematic framework and to address the properties on the existing Heritage Register. The historical context statements are rooted in O. Reg. 9/06 and consider potential design or physical, historical or associative, or contextual values. As part of the evaluation, each property was reviewed against the following questions:

- Does the property reflect an important theme in the Town's growth and development as expressed in the historical context statements?
- Does the property meet the eligibility standards embedded in its associated theme?
- Does the property have character-defining/associative features that directly relate to the potential or known heritage value of its associated theme and building type?
- Does the property meet the integrity considerations correlated to its associated theme?

If the questions were responded to positively in each category the property is not recommended for removal from the Heritage Register as a non-designated property at this time. Should a property not meet the criteria then it is recommended for removal from the Heritage Register and a reason for removal is provided. In some cases, Town staff have recommended the removal of properties which met the evaluation criteria. The data for each property not recommended for removal from the Heritage Register has been paired with the historical

context statement and value statements so that reasons for listing are appropriately documented.

As part of the evaluation, properties were also reviewed for their potential known associations with people that have been identified as having significance to the Town of East Gwillimbury (see Section 6.4). To determine people associated with properties on the Heritage Register and to ensure consistency across the Town the following sources were consulted:

- County of York Gazetteer and Directory for 1870-71, 1870
- Illustrated Historical Atlas of the County of York, 1878
- Union Publishing Company's Farmers and Business Directory for the Counties of... York, 1908
- County of York (Ontario) Directory Bi-Yearly Edition, 1935-36
- Rolling, Gladys M., *East Gwillimbury in the Nineteenth Century: A Centennial History of the Township of East Gwillimbury*, 1966

It is important to note that this evaluation methodology does not constitute a complete evaluation against all O. Reg. 9/06 criteria. Rather it has been developed to address key indicators of value to ensure consistent and clear reasons for inclusion on the Heritage Register are expressed.

Properties that were determined to be not visible from the right-of-way during Screening were also evaluated. These properties used the same standardized method of determining potential known associations with people identified to have significance to the Town described above. As the existing conditions of the property could not be assessed due to limited or lack of visibility, property photos provided by the Town were used to update property data and provide a preliminary assessment of the physical characteristics and attributes of the primary structure. In

some instances, the existing photos provided by the Town did not provide enough detail or information, and as a result these properties could not be evaluated. Additionally, historical mapping and aerial photography were used to determine changes to property size and the location or demolition of any outbuildings such as barns. The known information was then used to determine if each property responded positively to its appropriate historical context statement, and recommendations were developed based on this response.

Town Staff and the Heritage Advisory Committee both reviewed the recommendations. Staff advised on properties which should be removed from the Heritage Register based on their knowledge of the property. These properties have been included in Appendix D and have been highlighted in yellow. The Heritage Advisory Committee advised on properties which should not be removed from the Heritage Register based on their knowledge of the property. These properties are included in Table 1 in Section 3.0 above.

Standardized Language

Standardized language was developed for the reasons for removal and for value statements to be consistent across properties and has been provided here for reference. The standardized language applied to the properties should be read in conjunction with the appropriate historical context statement. Where necessary individualized reasons were provided. Wording in square brackets indicates where language was made property specific.

Reasons for removal applied were:

- While the property reflects the theme of nineteenth century rural settlement in East

³ The term severed is used to mean an agricultural property which has been reduced in size substantially as compared between the 1878 Illustrated Atlas and the current parcel boundaries.

Gwillimbury due to its altered building the property is no longer an intact example of its type and does not meet the character defining/associative features and integrity considerations in the related Historical Context Statement.

- While the property reflects the theme of nineteenth century rural settlement in East Gwillimbury with its altered building the property is no longer an intact example of its type and does not meet the character defining/associative features and integrity considerations in the related Historical Context Statement. Additionally as a severed⁴ property it does not meet the character defining/associative features in the related Historical Context Statement.
- The property is not representative of the eligibility standards and character defining/associative features in the Historical Context Statement for the World Wars and Post-War Period.

Values statements applied as related to the criteria in O. Reg. 9/06 included:

- Design/Physical:
 - 1. i: The property is a representative example of a regional variation of the [architectural style] architectural style.
 - 1. i: The property is a representative example of an [type] type of architecture.
 - 1. i: The property is a representative example of modest nineteenth century residential architecture.
 - 1. ii: The property displays a high degree of craftsmanship.
- Historical/Associative:
 - 2. i: The property is associated with [person name], a significant member

of the community in the nineteenth century.

- 2. i: The property is associated with the [last name] family, who were significant in the community during the nineteenth century.
- 2. i: The property is associated with [person name], a prominent [profession] in the community.
- 2. i: The property is associated with the theme of settlement/daily life in Mount Albert, and supports the theme of economic and social development as a village community in the nineteenth century.
- 2. iii: The building was designed

by architect [architect name], a significant local architect.

- ♦ Contextual:

- 3. i: The property has contextual value as it contributes to the settlement pattern and early development of [settlement name], and supports the village character of the area.
- 3. i: The property has contextual value as it contributes to the settlement pattern and early agricultural development of East Gwillimbury, and supports the rural character of the area.

6.0 Historical Thematic Framework

6.1 Purpose and Methodology

Any large-scale heritage study requires identification of significant historical themes within the specified area of focus and an understanding of how and where these themes have expressed themselves over time. The following Historical Thematic Framework has been developed for the Town of East Gwillimbury Heritage Register Review and to respond to the objectives and scope of the project. The Historical Thematic Framework is organized to draw out key themes in the history of the Town to support the evaluation of properties on the existing Heritage Register. The Historical Thematic Framework is comprised of:

- A review of primary and secondary sources;
- A review of available historical mapping;
- A summary of properties on the existing Heritage Register;
- A list of important people for the establishment and development of East Gwillimbury;
- Identification of key historical themes within the Town of East Gwillimbury, with a selection of key dates; and
- A historical narrative based on this information.

A review of primary and secondary sources describing the Town's history and a review of available historical mapping was conducted

to identify historical themes and key dates that contributed to the establishment and development of the Town, and to understand the historical and current land uses, and how these influenced the Town's built form over time. Historical themes are presented with a primary theme and associated sub-themes. Sub-themes highlight general and specific periods, evolutions, events, organizations, people, and sites. Selected key dates for events that give an overview of the evolution of the area are provided within. Using these sources, themes and dates, a historical narrative has been developed to provide background and context for properties currently listed on the Heritage Register.

The resulting historical narrative is not an exhaustive history of the Town of East Gwillimbury. It is an organizing tool providing a basis for the project team to systematically assess and evaluate individual properties that are currently on the Town's Heritage Register. As a result, the thematic framework, historical narrative and associated historical context statements do not cover in depth all key themes, time periods, and agents of change identified for the Town as part of this study. The exclusion of some aspects of the history of the Town is not a comment on its significance. The thematic framework was specifically developed to reflect the scope of the project and thus generally reflects the aspects of the Town's history that are currently reflected in the built form of those properties currently on the Heritage Register.

6.2 Review of Primary and Secondary Sources

6.3 Review of Historical Mapping

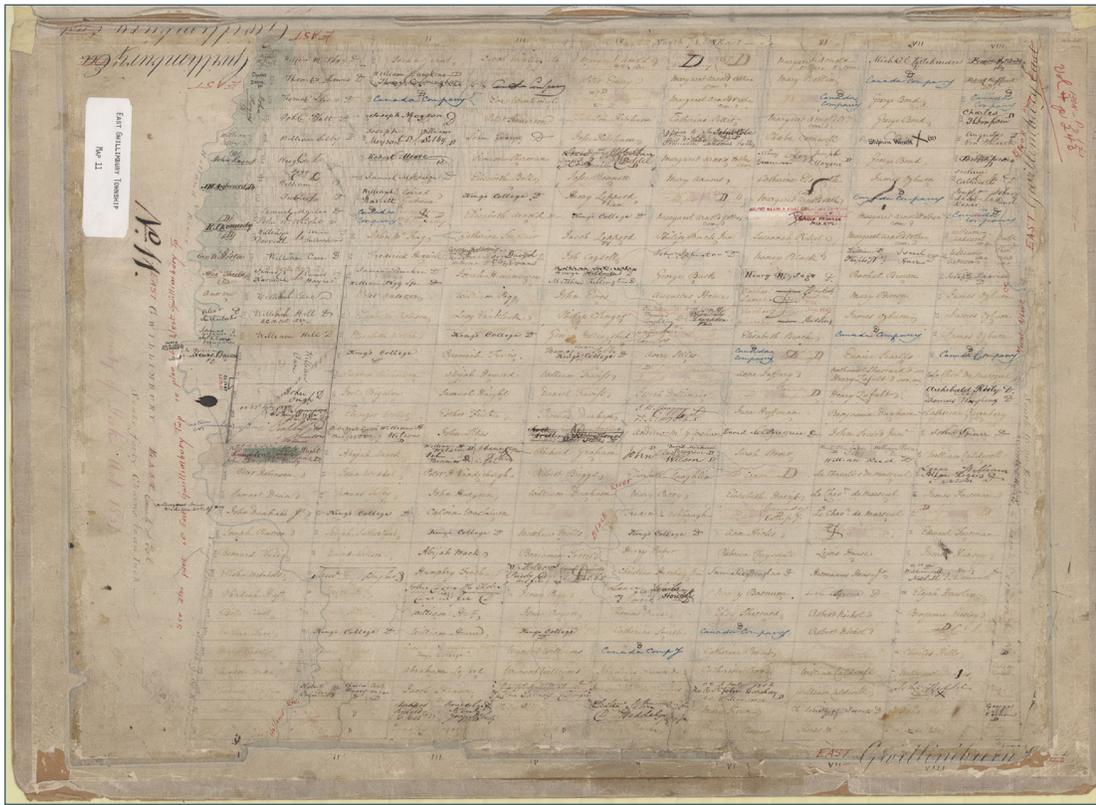

A review of available nineteenth- and twentieth-century mapping, as well as aerial photography illustrates the development of the Town of East Gwillimbury over time. In addition, some of the individual maps provide useful information, such as: the name of early property owners (Maps 6, 7, 8, and 10); the location of historical features of interest (Maps 8, 9, 10, 11, and 12); architectural and construction details of individual structures (Maps 8, 10, 11, 12, and 14); and the topographic features of the area (Maps 12, 13, and 14).

Map 6: East Gwillimbury, 1811 (Archives of Ontario)

Map of East Gwillimbury, 1811

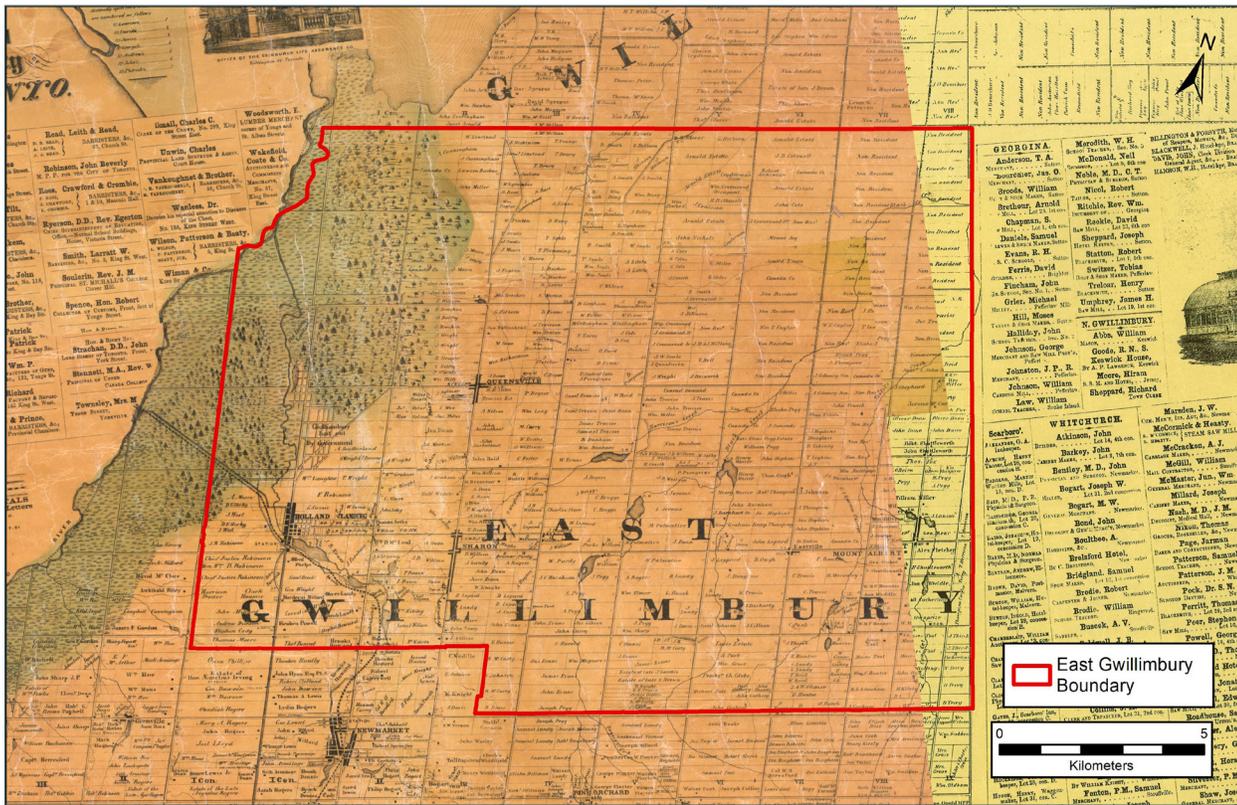

The area in 1811 shows that lots and concessions have begun to be delineated on land east of the Holland River, though its coverage is limited. The land immediately along the shoreline is indicated to be marshy, and therefore not parcelled in this early land-allotment system. Yonge Street is identifiable, as well as Old Yonge Street north of the lots and concessions. The surrounding land appears to be undeveloped but plans for their use have been indicated. Land northeast of the lots and concessions has been allocated to the school master, and land to the south has been allocated for clergymen and a hospital. Without building footprints, however, there is no further evidence of how these lands were associated with these uses.

Map 7: East Gwillimbury Township, 1857 (Archives of Ontario)

Map of East Gwillimbury, 1857

By 1857, lots have been clearly and evenly divided, with landowners indicated within each parcel. The concessions now extend east to the Black River and beyond, indicating the development and expansion of the area. The land adjacent to the Holland River has also been parceled.

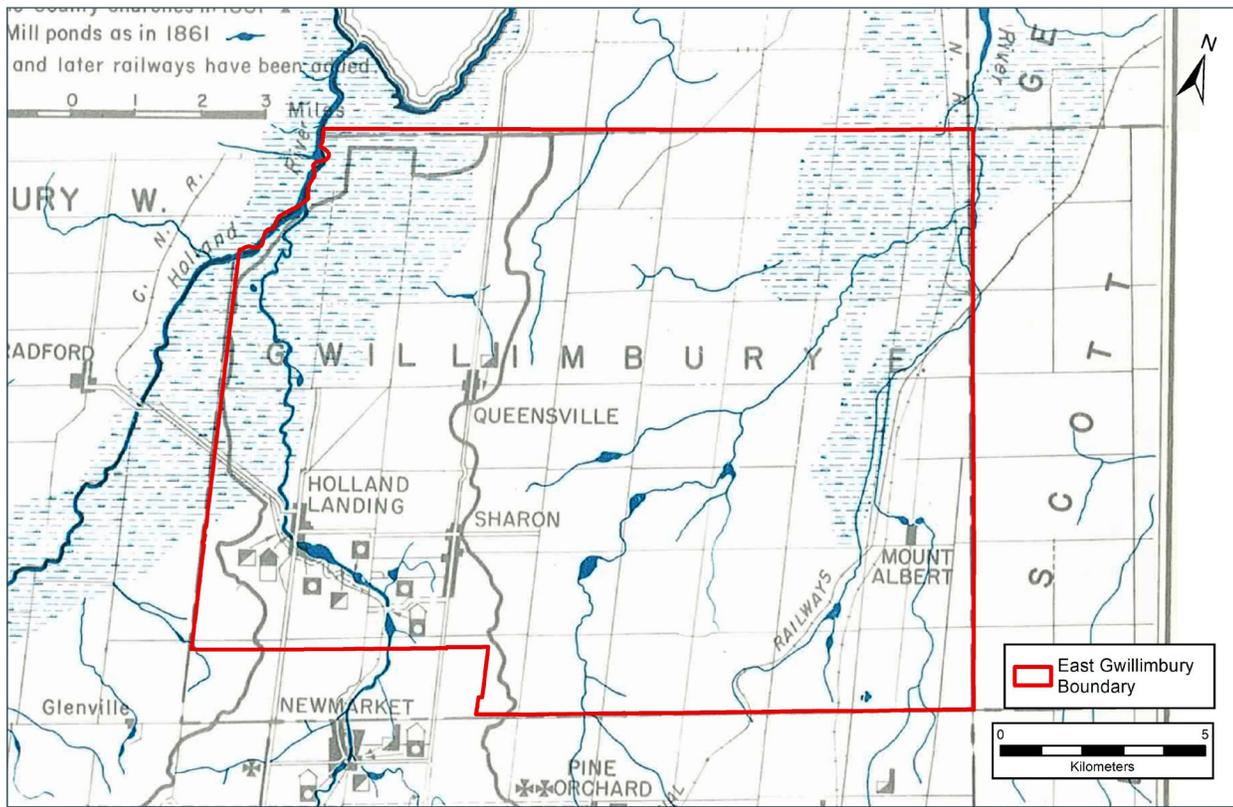

Map 8: East Gwillimbury Township, 1860 (Tremaine's Map of York County, 1860)

Tremaine's Map of York County, 1860

The 1860 Tremaine's Map provides greater detail on the development of East Gwillimbury by the mid-nineteenth century. Holland Landing, Sharon, Queensville and Mount Albert are labelled, with their areas of building density within each village indicated. Concession roads are clearly demarcated, and several lots have been subdivided since their initial parcelling. The tracks of the Northern Railway, which runs along the west side of the Holland River through East Gwillimbury, is marked. Land to the northeast of the area is indicated as forested, undeveloped land, and to the northeast contains a number of "Non Resident" lots, which represent land that has an owner that does not reside on the property.

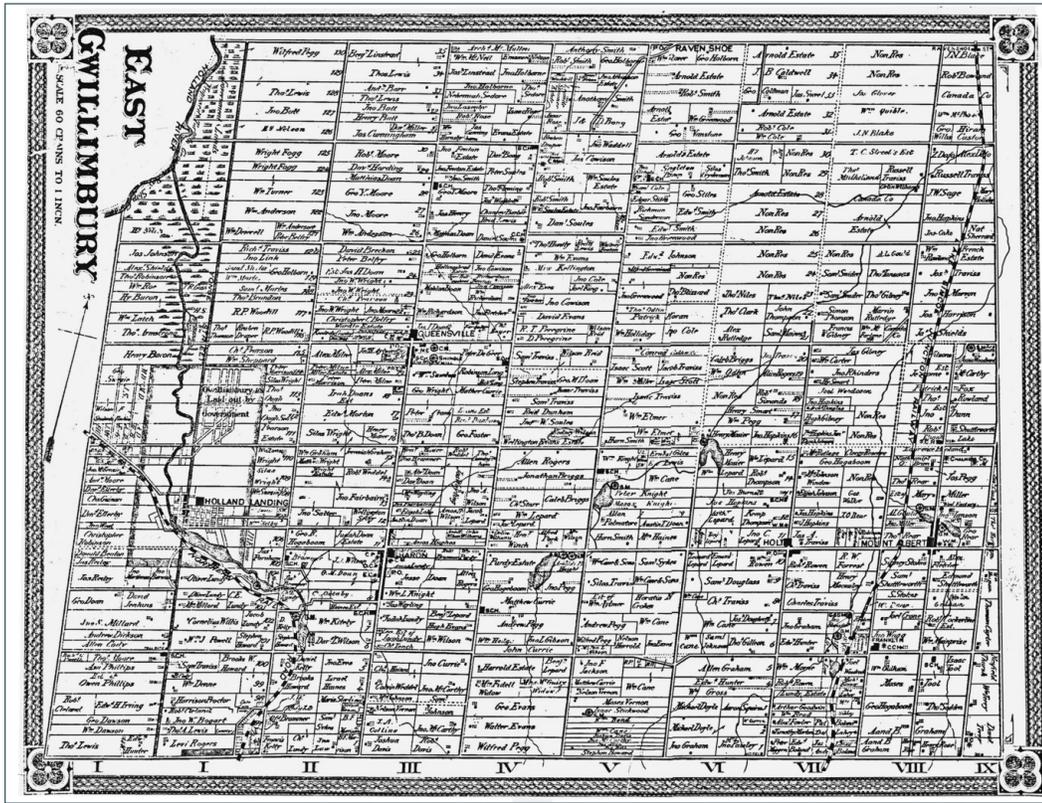

Map 9: History based on Tremaine's Maps of 1861 (Town of East Gwillimbury)

History Based on Tremaine's Map of 1861, c. 1970

This undated, twentieth-century map is based on Tremaine's 1861 map of York County. Areas of density are indicated in Holland Landing, Sharon, Queensville and Mount Albert. The map indicates that there were several mills located along the east branch of the Holland River between Holland Landing and Sharon. There was also a steam-powered sawmill in Queensville. The Northern Railway shown in the 1860 map is still present, and two additional lines (Canadian National Railway) are now included running through the east portion of East Gwillimbury which both run west of Mount Albert.

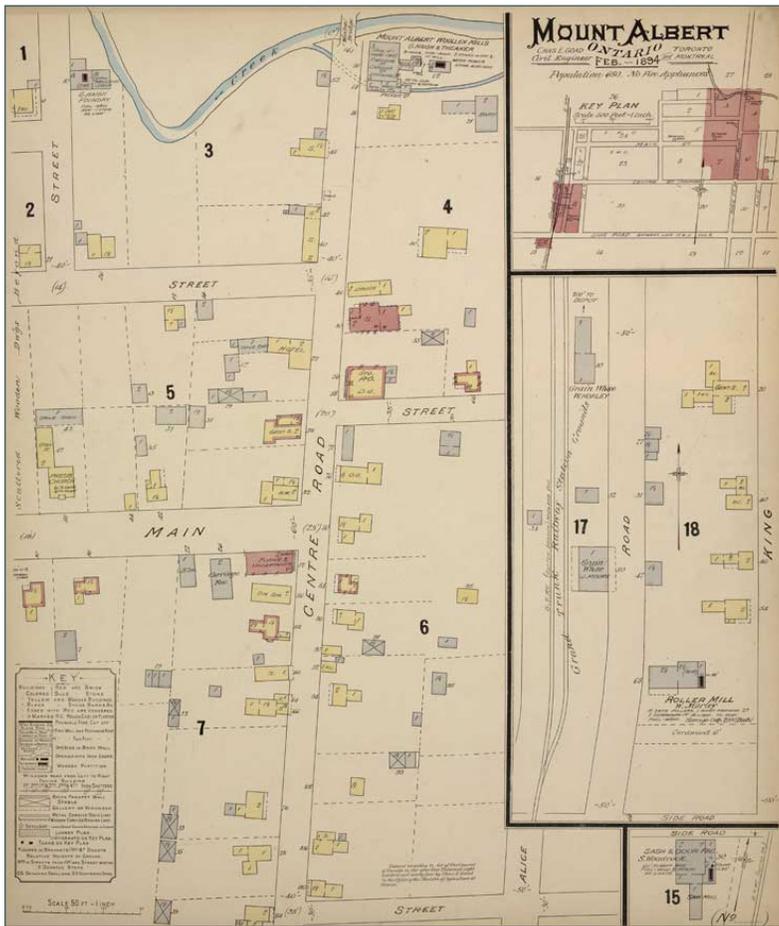

Map 10: Township of East Gwillimbury, 1878 (*Illustrated Historical Atlas of the County of York, 1878*)

Illustrated Historical Atlas of the County of York - East Gwillimbury Sheet, 1878

The village and agricultural growth are highlighted in the 1878 map of East Gwillimbury. Expanded areas of density in Holland Landing, Sharon, Queensville, and Mount Albert are visible, in addition to indicated growth in the hamlet of Holt. Holland Landing has additionally been further divided with additional roadways beyond its indicated village core. Post offices, schoolhouses, and churches are also labeled on the map, indicating civic, social and cultural development in the area. Operating mills are noted on several points along the Holland River, as well as branches of the Black River. The rural land in the area shows further subdivision of parcels as the population in the area grows.

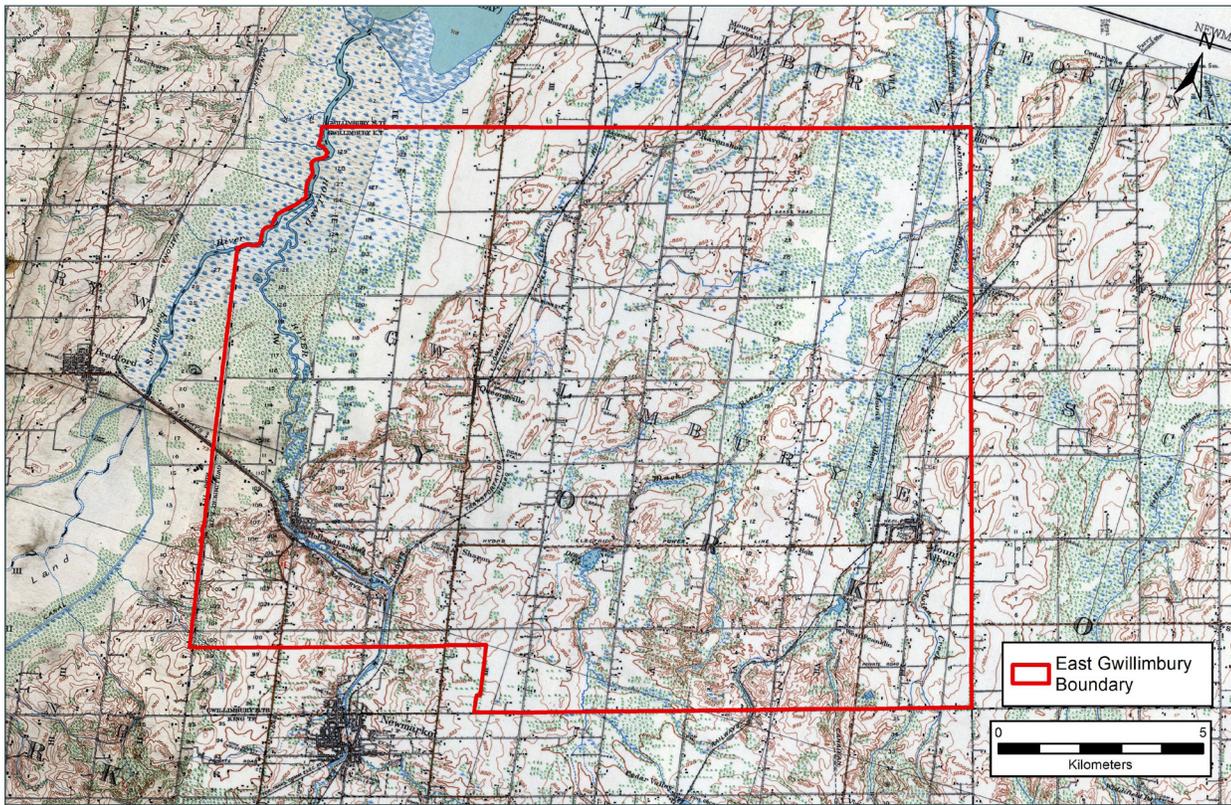

Map 11: Fire Insurance Plan of Mount Albert, 1894 (Charles E. Goad Company, 1894)

Goad's Fire Insurance Plan of Mount Albert, 1894

Mount Albert in 1894, according to its Fire Insurance Plan, possessed a diversity of residential, commercial, civic, and industrial buildings within its village centre and along the rail line. Significant streets located within the village include Centre Street, Main Street, and King Street. The location of wooden structures along these primary streets, with brick structures on secondary streets is indicative of the location of the early development of the village. The proximity of Vivian Creek and the Grand Trunk Railway (formerly Canadian National Railway) to mills and grain storage buildings underscores the significance of agriculture and industry in promoting prosperity and growth in the village and surrounding rural area.

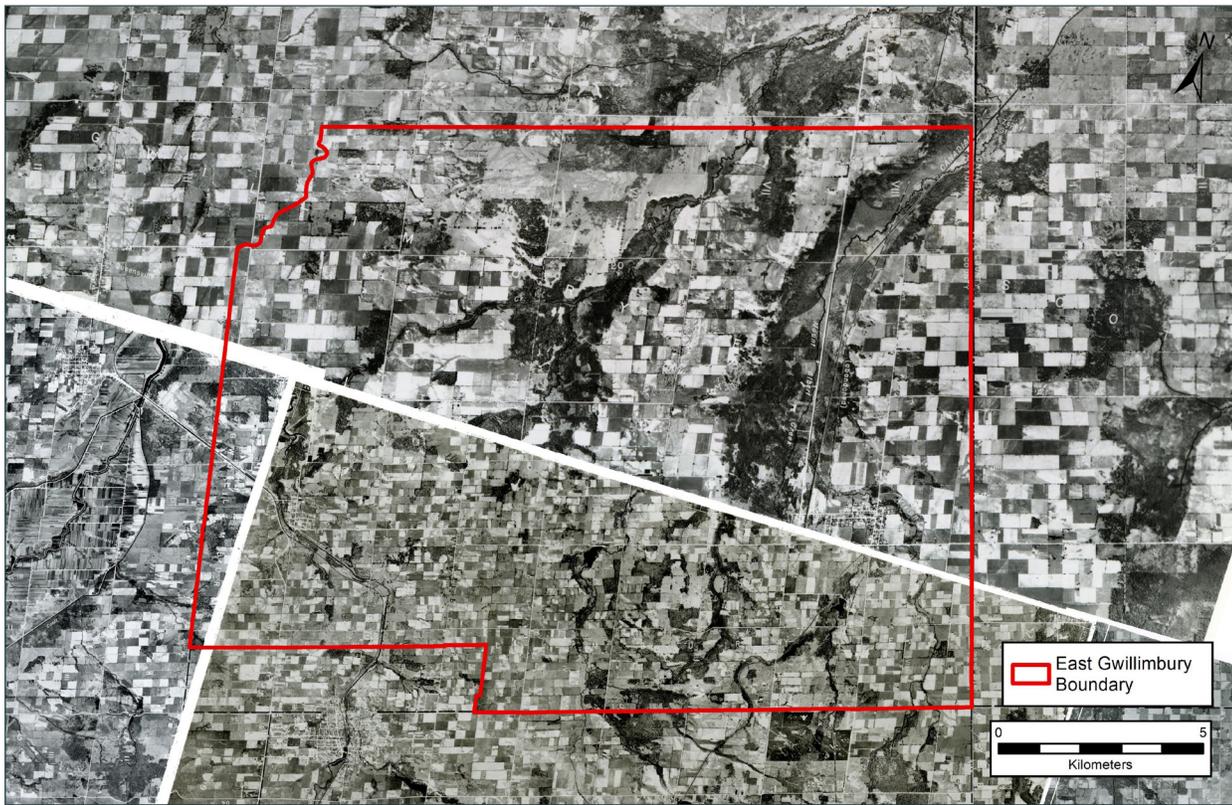

Map 12: Topographic Map of East Gwillimbury, 1929 (NTS Newmarket Sheet No. 31 D/03, 1929)

NTS Map of York County - Newmarket Sheet No. 31 D/03, 1929

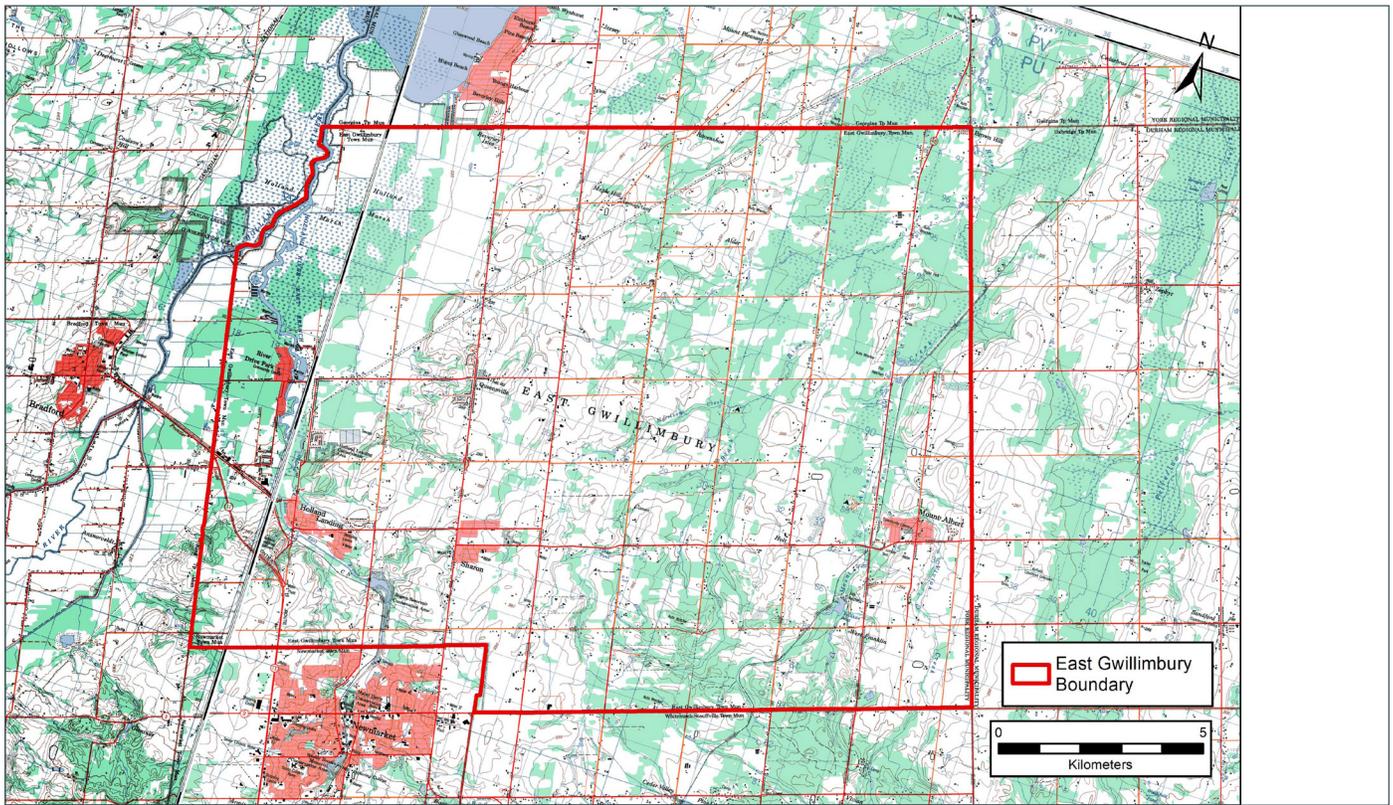

Building footprints on this map show that villages have continued to have density along their earliest roadways. Growth is also evident through the addition of new roads surrounding village cores. Rural areas remain largely agricultural, with buildings located along concession lines and side roads. The railways indicated in earlier maps are still present in 1929 and are joined by the Toronto Transportation Commission Electric Railway. The line runs north-south through the west portion of East Gwillimbury, with stations at each concession line between Sharon and Ravenshoe.

Map 13: Aerial Photograph, 1954 (University of Toronto)

Aerial Photograph, 1954

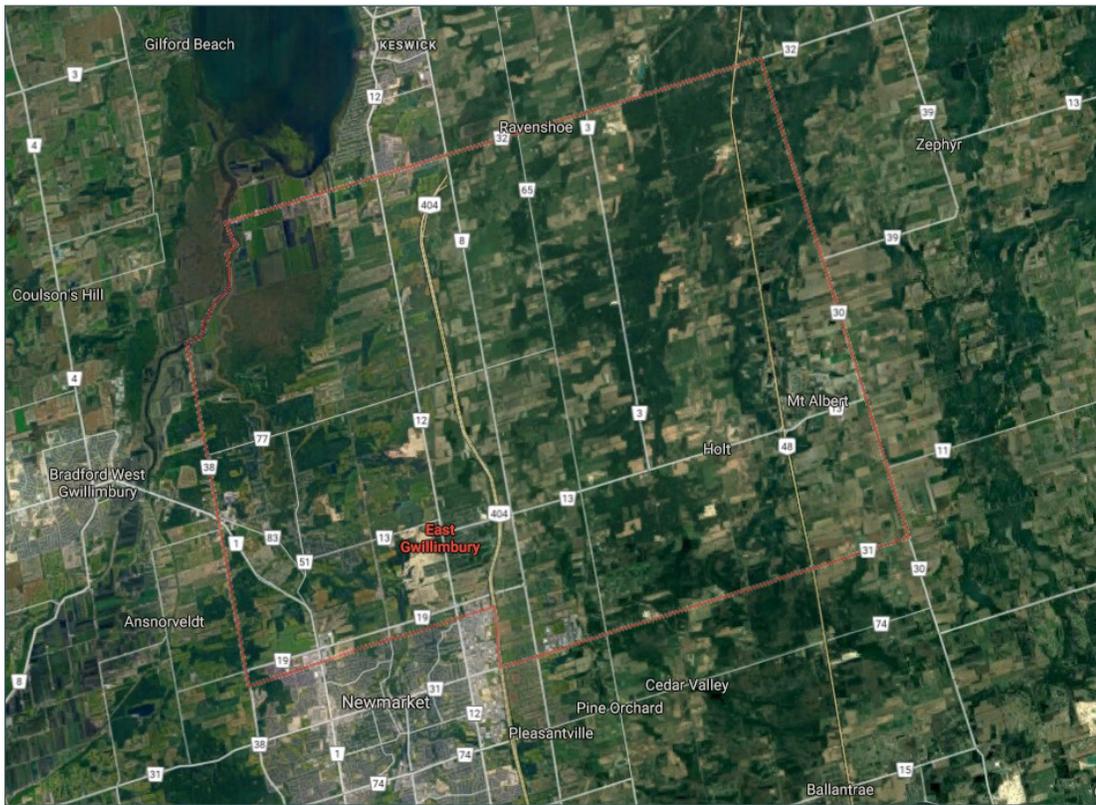

Most evident on the aerial photograph from 1954 of the area are the agricultural lands that dominate the landscape and the influence of waterways on the topography. Surrounding the branches of the Black River that spread throughout the northeast corner of East Gwillimbury are undeveloped green spaces and several pockets of wooded areas. These non-agricultural rural areas impact the landscape in the Town. The waterways also had clear influence on the settlement and development of villages in the Town. The location of Holland Landing in such close proximity to the east branch of the Holland River, and Mount Albert to the Vivian Creek, is visible in this photograph. The primary roadways continue to follow concessions and side roads.

Map 14: National Topographic Survey Map of Newmarket showing East Gwillimbury (NTS Sheet No. 31 D/03, Department of Energy, Mines and Resources, 1988)

NTS Topographic Map of Newmarket (Sheet No. 31 D/03), 1988

Significant changes on the map of East Gwillimbury in 1988 are largely evident in the addition of roadways. The introduction of Highway 404, which terminates at the southern border of East Gwillimbury, and Highways 11 and 48 through the southwestern corner and eastern portion of the Town respectively indicate greater connectivity to larger municipalities to the south. The areas of density within Holland Landing, Sharon, Queensville, and Mount Albert have expanded, with additional roadways and building footprints expanding the outer limits. The branch of the Canadian National Railway that ran through Brown Hill is no longer extant. Larger building footprints in rural areas indicates larger scale farming, and continues to be the predominant land use.

Map 15: Satellite Imagery of the Town of East Gwillimbury (Google Imagery 2019)

Satellite Imagery of the Town of East Gwillimbury, 2019

Similarly to the 1988 map, the impact of transportation expansion is most evident on the contemporary satellite image of East Gwillimbury. Highway 404 has been extended into the Town of East Gwillimbury, greatly altering the landscape in the area. Remaining largely rural, the suburban development surrounding Holland Landing, Sharon and Mount Albert is notable. The green space surrounding waterways noted in the 1954 aerial is still largely present.

6.4 Significant People in East Gwillimbury

The following people have been identified as having significance to the Town of East Gwillimbury. Typically, these individuals were influential in the establishment and development of the Town or specific village cores. The list has been created in order to assist with the identification of properties on the Heritage Register that are associated with people significant to the community. As a result, the list focuses on important people from the nineteenth century, as the properties on the Register were primarily constructed during this time period.

Holland Landing

- Joseph Johnson – First settler to Upper Landing
- Peter Robinson – Prominent resident and entrepreneur during early settlement and set out various town plots
- Major Samuel Holland – Surveyor-General of Canada whose name was given to the village and river by John Graves Simcoe
- Francis Phelps – operator of Phelps Tavern located in Robinson's Inn
- George Lount – Postmaster
- William Luck – Wheelwright
- William H. Thorne – Reeve of Holland Landing before 1872

Sharon

- David Willson – Founder of the Children of the Peace
- Ebenezer Doan – Master builder of Sharon Temple
- Thomas Selby – Influential Army Colonial and established Selby Burying Ground on his property
- Robert Brammar (also spelled Brammer in

some sources) – Village blacksmith

- Rueben Phillips – Owned and operated a grist and cedar mill
- John Graham – Band leader and piano tuner at the Sharon Temple
- Amos Lundy – Prominent farmer
- Dr. John Wilmot Montgomery – Village practitioner
- Peter Rowan – Village wheelwright

Queensville

- James Aylward – Opened the first store in 1830, teacher at the first school, and prominent merchant
- William Hackett – Popular early merchant and "Hackett's Corners" named after him
- Bill Morley – Built and operated flour and grist mill
- Wright Fogg – Shoemaker, librarian, and general merchant
- Dr. Benjamin Pearson – Physician and surgeon
- John Soules – Planned the Queensville Cemetery

Mount Albert

- William Thomas Rear – Early settler who owned farmland where much of Mount Albert was built
- Isaac Toole – Prominent early settler
- John Weddel – Prominent early settler
- Robert Hunter – Built the first store in the village
- John Leek – Early merchant
- John Hamill – Owner of the Valley Mills Hotel
- John McKeown – Proprietor of the Royal Oak Hotel

6.5 Identified Historical Themes

Several historical themes have been identified which are:

- Pre-Colonial Habitation
- Settlement
- Village and Hamlet Development
- Agriculture
- Transportation
- Industry
- Civic and Cultural Growth

For each historical theme sub-themes have been identified as well as significant dates related to the theme or sub-theme.

Pre-Colonial Habitation

- Indigenous presence
- Trails and trade routes

Significant Dates

- 11,500-9,500 years ago – Paleo-Indian Period, small nomadic groups following seasonally available resources
- 9,500-2,500 years ago – Archaic Period, increasing group size and territoriality
- 2,500-400 years ago – Woodland Period, introduction of pottery and seasonal agglomeration of groups. Eventually leads to permanent agricultural settlements and historically-documented groups in the region

Settlement

- Indigenous presence
- Indigenous-European relations, land transfers and treaties
- Surveying and pioneer settlement and lot patterns

- Influence of topography and physiography on settlement patterns
- Immigration
- Village formation around the East Holland River

Significant Dates

- 1615-1760 – French Colonial Historic period, Recollet and Jesuit missionaries venture throughout the territory in the early 17th century. Fur trade economy continuing through the 18th century
- 1763 – Royal Proclamation and beginning of British negotiation for lands
- 1787-1788 – Negotiations for the Township of East Gwillimbury part of the Johnson-Butler purchase
- 1800 – Area of East Gwillimbury surveyed by John Stegman
- 1802 – First settlers arrive in the site of Holland Landing
- 1923 – Williams Treaties signed

Village and Hamlet Development

- Establishment of villages
- Hamlets formed around well-travelled roadways and intersections
- Commerce and businesses locate along main streets
- Diversity of residential, commercial, and civic and institutional buildings

Significant Dates

- 1808 – Construction of first sawmill
- 1820s – Village of Holland Landing established
- 1843 – Hackett's Corners renamed Queensville
- 1850 – The Town of East Gwillimbury is

established

- 1859 – Area of East Gwillimbury surveyed by Lindsay
- 1946 – Construction of residential cottages begins – forming community known today as River Park Drive

Agriculture

- Agricultural areas remaining within and around current village cores
- Strong integration of agriculture into village communities due to presence of many mills, train routes, storage warehouses, etc.
- Grain farming
- Mixed farming
- Livestock farming
- Mechanization
- Later 20th-century farm amalgamation

Transportation

- Waterways: Holland River East, Mount Albert Creek, Vivian Creek
- Railways (National “Northern” Railway, Canadian National Railway – later Lake Simcoe Junction Railway) stimulate growth
- Location of former railway stations/hotels
- Early paths/trails/roads: Carrying Place Trail, Yonge Street, Old Yonge Street, Centre Street, Main Street (Mount Albert)
- Connections to Indigenous paths and portage routes
- Location of major travel routes to Toronto (north-south): Yonge Street, Leslie/Main Street, Highway 404, Highway 48, Highway 11

Significant Dates

- 1793 – Governor John Graves Simcoe travels the Carrying Place trail
- 1794 – Yonge Street is surveyed by Augustus Jones
- 1794 – Construction of Yonge Street is initiated
- 1797 – Yonge Street reaches Holland Landing
- 1853 – Construction of the Northern Railway begins
- 1877 – Construction of the Lake Simcoe Junction Railway
- 2006-2014 – Construction of the extension of Highway 404 from Green Lane to Ravenshoe Road

Industry

- Waterpower: concentration of water powered grist and flour mills and sawmills
- Significant mills: Franklin Mill, Eves Mill, Red Mills, Mount Albert Woollen Mills

Significant Dates

- 1808 – Construction of first sawmill
- 1821 – Construction of Red Mills in Holland Landing

Green Space

- Holland River, creeks, marshes and wetlands
- Conservation Areas: Holland Landing, Rogers Reservoir
- Wildlife habitat, fish hatchery
- Conservation and preservation efforts
- Parks, gardens, trails, valleys
- Scenic views
- Other natural features and landscapes

Civic and Cultural Growth

- Sports and recreation
- Institutional growth: libraries, post offices, schools, shops, community centres
- Religion: Sharon Temple, The Children of Peace, churches and cemeteries (proliferation of churches as a result of Quakers in the area during early settlement)
- Social organizations
- Celebrations, customs, rituals

Significant Dates

- 1825-1832 – Sharon Temple is constructed

6.6 Historical Narrative for the Town of East Gwillimbury

Pre-Colonial Habitation and Activity, 11,500 years ago - 1793

The land of present-day Town of East Gwillimbury has been a place of human activity for over 12,000 years. With the presence of distinct landforms, resources, and many important trade routes throughout pre-colonial and early colonial history in the area, the land has a rich past.⁵ The first inhabitants of what is today York Region were members of the Mississauga, Huron-Wendat, Haudenosaunee (Five Nations Iroquois), and Anishnaabeg (Algonquin) nations, who used the land as hunting grounds, for habitation, and for portage passage routes in addition to trade. The east branch of the Toronto Carrying Place trail, which runs through East Gwillimbury, is among the most significant trails in Southern Ontario during the pre-colonial and early-colonial period.

The Toronto Carrying Place trails were a network of trails that connected the navigable portions of

⁵ More information on Indigenous history and pre-colonial inhabitation of East Gwillimbury can be accessed in the York Region Archaeological Management Plan from 2013.

the Rouge, Don, and Humber rivers in the south to the navigable portion of the Holland River in the north, thus completing a transportation corridor between Lake Ontario and Lake Simcoe (Veilleux 2011). Other trails followed other major waterways along the north shore of Lake Ontario. Historical accounts and archaeological evidence highlight the importance of the trails in the fifteenth to eighteenth centuries, though the location of the trails along major environmental features could indicate a significantly longer use of the transportation routes (Austin 1995; MPPA 1986). The Carrying Place trails were in use at the time of European arrival in the region, and were travelled by several well-known explorers and traders as well as the colonial government – including Governor John Graves Simcoe who travelled up the Carrying Place from York (present-day Toronto) to what is now Holland Landing in 1793.

Yonge Street and Surveying Lands, 1790-1800

The Township of East Gwillimbury (now the Town of East Gwillimbury) was negotiated by the British as part of the Johnson-Butler purchase of 1787-1788 and again as part of the 1923 Williams Treaties. Signed by the Mississauga and Chippewa nations, the area remains within the traditional territory of the Mississaugas of Alderville First Nation, Curve Lake First Nation, Hiawatha First Nation, Scugog Island First Nation and the Chippewas of Beausoleil First Nation, Georgina Island First Nation and the Rama First Nation (collectively known as the Williams Treaties First Nations) and is within the ancestral territory of the Huron-Wendat First Nation (Department of Indigenous and Northern Affairs 2013; R. Surtees 1984; Williams Treaties First Nations 2017).

Following the Johnson-Butler purchase, the

first major colonizing project to impact the settlement of the Township of East Gwillimbury was the construction of Yonge Street beginning in 1794. The major arterial road, which currently runs through the west portion of the Town, was conceived of by Governor Simcoe during his journey along the Carrying Place trails in 1793 and surveyed by Augustus Jones the following year. Simcoe initiated the construction of Yonge Street in order to promote trade from York to Lake Simcoe, as well as connect the city in the south to British naval posts on Georgian Bay (Gentilcore and Head 1983: 150; Canniff 1878). In addition to ordering the construction of Yonge Street, Simcoe was also responsible for naming the Township of East Gwillimbury after his wife, Elizabeth Gwillim.

Yonge Street was originally surveyed from Eglinton Avenue in York to Doane Road in Holland's Landing (later Holland Landing), with lots laid out on either side that encouraged settlement (Miller Dickinson Blais 2011; (Berchem 1977):28). Though its survey and construction began in 1794, Yonge Street did not reach Holland Landing until 1797, which led to the first official survey of the Township in 1800 by Stegman (Canniff 1878:XVII). In 1802, the first settlers arrived at the site of Holland Landing. Many of the early settlers were United Empire Loyalists. These British subjects arrived in the area from eastern portions of the United States, fleeing the country in the years following the American Revolution (Miller Dickinson Blais 2011). The construction of Yonge Street and surveying of the surrounding lands opened up greater opportunity for agricultural and industrial prosperity for the communities that were establishing in the area.

The Holland River and Early Settlement, 1800-1820

Early settlement in East Gwillimbury was largely based on agricultural development and mill industry. The success of agriculture and farming

in the Town is tied to the proximity of Yonge Street, which facilitated the export of products south to Toronto. A majority of the early crops were grains, in particular wheat, oats and barley. Raising beef and dairy cattle was also popular (Chapman and Putnam 1984:177). Over time, crop varieties diversified, and many smaller farms were amalgamated (Chapman and Putnam 1984:177). As agricultural production established itself in the first decades of the nineteenth century, early industry also began to emerge along the east branch of the Holland River. The construction of a sawmill in 1808 in Holland Landing on the Holland River was the first of this type of industry to be introduced to the area. This mill became the site of a larger mill in the 1820s, which became a well-known flour supplier throughout York County (Rolling 1966:21). In the years that followed, other mills were built along the Holland River, with at least seven in operation by 1861 (History based on Tremaine's Maps of 1861). Though in more modest operations, mills were also constructed along branches of the Black River - Mount Albert Creek and Vivian Creek - in the eastern portion of the Township. The construction and operation of these mills provided the locations of the four primary villages that were established in the early nineteenth century.

The Villages of East Gwillimbury, 1820-1913

In the nineteenth century, many hamlets and villages emerged as agricultural, industrial, and commercial activity expanded in the Township of East Gwillimbury. Hamlets were typically located at well-travelled intersections among the rural concessions, such as Maple Hill, Alder, Ravenshoe and Eastville (present-day Holt). Additionally, hamlet development was encouraged by the construction of the Canadian National Railway (CNR) and the Lake Simcoe Junction Railway branching from the CNR in the mid-nineteenth century. Brown Hill and Franklin were both established in proximity to these (now

abandoned) rail lines. These hamlets typically did not expand to contain more than a general store or post office but were important to rural development during this earlier time period.

The construction of the Canadian National Railway in the eastern portion of the Township, as well as the National "Northern" Railway (also known as the Northern Rail Road) on the western side following the Holland River, was also influential in establishing the villages of Holland Landing and Mount Albert. Aided by their early mill history, due to their proximity to waterways, these two communities developed into prosperous villages by the end of the nineteenth century. The villages of Hope (later Sharon) and Hackett's Corner (later Queensville) also grew in prominence during the nineteenth century. The school, churches, town halls, hotels, commercial businesses constructed along their main roads contributed to the social, political, cultural and economic growth in the Township. Together, these four villages are now considered the village cores of the Town of East Gwillimbury.

Religious Centre, 1800-1850

The early village settlements in East Gwillimbury attracted a number of Quakers, who journeyed to Upper Canada from Connecticut, Vermont and New York in the early nineteenth century (Miller Dickinson Blais 2011). These immigrants were drawn to the area with the promise of land grants, as well as the freedom to practice their faith (ASI 2012). An early settler, David Willson, broke away from the Quaker church and established a new religious sect called The Children of Peace. Founding this new religious society based on peace, equality and social justice, The Children of Peace went on to build the province's first shelter for the homeless and

first cooperative and credit union (Sharon Temple 2011). They were also behind the construction of a number of unique structures in the area, including Sharon Temple (Parks Canada 2000; ASI 2012). In addition to The Children of the Peace, there were many other religious denominations, such as Anglican, Roman Catholic, United, Baptist, and Presbyterian, represented by the residents of East Gwillimbury. As a result, a number of churches were built within the Township throughout the nineteenth and early twentieth centuries.

Twentieth and Twenty-First Century, 1913-2014

The Town of East Gwillimbury continued to maintain its balance of agricultural land and village centres into the twentieth century. In the first half of the twentieth century, a majority of citizens were employed in agriculture and farming (County of York Directory 1936). Despite economic decline in the 1930s, which was felt on a national level, the villages saw slow but steady growth and expansion. The introduction of additional major highways and rail lines, connecting East Gwillimbury with Toronto, has also contributed to the growth of the communities in the area. Most notably, the expansion of Highway 404, completed in 2014, from Green Lane to Ravenshoe Road. The village cores have seen suburban expansion, with residential development occurring in the late twentieth and early twenty-first centuries. The topography of East Gwillimbury, etched with waterways and within the northeast section of the Ontario Greenbelt (Greenbelt Plan 2017), continues to define the area through its many green spaces. These areas of geographical and ecological interest today are largely used as hiking trails and are protected spaces.

7.0 Historical Context Statements

Themes identified within the Historical Thematic Framework have been developed into historical context statements. The themes that were developed are designed to reflect the history of the Town of East Gwillimbury as it is represented by the properties currently listed on the Heritage Register. These historical context statements were used to assist in the evaluation of the properties on the existing Heritage Register.

Historical context statements can be used to identify similar property types, as well as common qualities and characteristics that these properties possess, allowing for comparative analysis. For example, the Agricultural theme was identified as a significant theme for the Town of East Gwillimbury. There are a number of rural properties that are indicative of the early lot and concession pattern that was laid out during early settlement and the built forms associated with agricultural activity from that period are similar across these properties. By identifying these similarities, those properties that remain intact and are most representative of agricultural development can be identified.

Historical context statements can also be used to identify the characteristics or qualities of a place or a time period. While the resources within an identified place of significance may have different styles, building types, dates of construction, or materials, their collective qualities or geographic location provide information on the development or character of an area. For instance, the theme of Holland Landing identifies that properties of a variety of building types (commercial, residential, industrial, civic and institutional, etc.) can be significant, as all these building types represent the settlement and establishment of the village core.

It should be noted that properties may be significant under more than one context/theme,

and all that apply should be used for evaluation.

Properties that are not recommended for removal from the Heritage Register can be further understood through their appropriate Historical Context Statement, which provides general characteristics and qualities that compliment the specific property data and background research developed for individual properties during Evaluation.

Historical context statements (Appendix A) were developed for the following themes:

- Agricultural
- Rural Civic and Institutional
- Holland Landing
- Sharon
- Queensville
- Mount Albert
- World Wars and Post-War Period

7.1 Contents of Historical Context Statements

Each historical context statement is comprised of: a statement of significance, associated building types, eligibility standards, character defining/associative features, and integrity considerations. General definitions of these components are outlined below.

Statement of Significance

The statement of significance included in each theme provides the contextual information to situate associated properties within the broader history of the Town of East Gwillimbury. The statement outlines the qualities that are typically present within a property to make it a significant

resource within that theme. Within each theme a period of significance has been identified. This time frame should be used as a general guide, as it encompasses the majority of properties represented by the theme, however properties that fall outside of the designated period can still be considered significant if it meets other eligibility standards, character defining/associative features, and integrity considerations. Additionally, a general geographic location has been provided within each statement of significance that outlines where properties associated with a theme typically are located. Similar to the period of significance, these boundaries are provided as a guideline, but are not a requirement. Properties that fall outside of the geographic location defined in a theme can still be considered significant if it meets other eligibility standards, character defining/associative features, and integrity considerations.

Associated Building Types

The list of associated building type(s) provided for each theme aims to define the way that a theme is expressed in property type.

Eligibility Standards

The eligibility standards have been developed to provide a base assessment for evaluation. These standards are based on the qualities and characteristics that are typically exhibited by a representative property of a theme. Properties do not need to meet all eligibility standards to be

considered significant. The eligibility standards are guidelines based on knowledge of the known qualities and characteristics of property types within the theme.

Character Defining/Associative Features

The character defining/associative features of a theme are identified elements of a property or building type that communicate its significance. Typically, these features are tangible qualities related to construction method, material, or setting. Properties do not need to possess all character defining/associative features to be considered significant. The character defining/associative features are guidelines based on knowledge of the known qualities and characteristics of property types within the theme.

Integrity Considerations

Integrity aspects and consideration are guidelines for assessing resource integrity within a specific context/theme. These considerations are developed through the consideration of how vulnerable a building type would be within the given theme and provides a standard that should generally be met to be considered significant. There are many variables to consider in assessing integrity depending on why a resource is significant. The standard for material integrity, for instance, can be lower for properties that are associated with an important person or event.

8.0 Screening and Evaluation Results

8.1 Summary of Screening Findings

The following table and Appendix B present the results of the screening.

Table 4: Screening Results

	Property not recommended for removal and will not be subject to further evaluation	Property will be considered in the second phase, Evaluation	Property recommended to be removed from the Heritage Register
<i>The property (building) is currently:</i>			
Duplicate entries or incomplete location information	N/A	N/A	7
Included on the Heritage Register as a Part IV designated property under the <i>OHA</i>	12	N/A	N/A
Included as a non-designated property on the Heritage Register and contains a cemetery	15	N/A	N/A
Located on or associated with the Sharon Temple National Historic Site	7	N/A	N/A
Included as a non-designated property on the Heritage Register and is not a 'real' property asset	2	N/A	N/A
The property (building) has recently been denied a removal request by the Heritage Advisory Committee and/or Town Council based on information provided by the town planner.	3	N/A	N/A
Included as a non-designated property on the Heritage Register and is visible from the right-of-way. The property has sufficient integrity to express the known or potential heritage value or interest of the property	N/A	345	N/A
Included as a non-designated property on the Heritage Register and is not visible from the right-of-way. Aerial and satellite images, as well as property photos provided by the Town were used as part of the evaluation process	N/A	47	5

	Property not recommended for removal and will not be subject to further evaluation	Property will be considered in the second phase, Evaluation	Property recommended to be removed from the Heritage Register
<i>The property (building) is currently:</i> Included as a non-designated property on the Heritage Register and is visible from the right-of-way. The property does not have sufficient integrity to express the potential or known heritage value or interest of the property or does not match the property description/photo on file for this property	N/A	N/A	18
Total:	39	392	30
% Of Current Heritage Register (463 properties)	8%	85%	7%

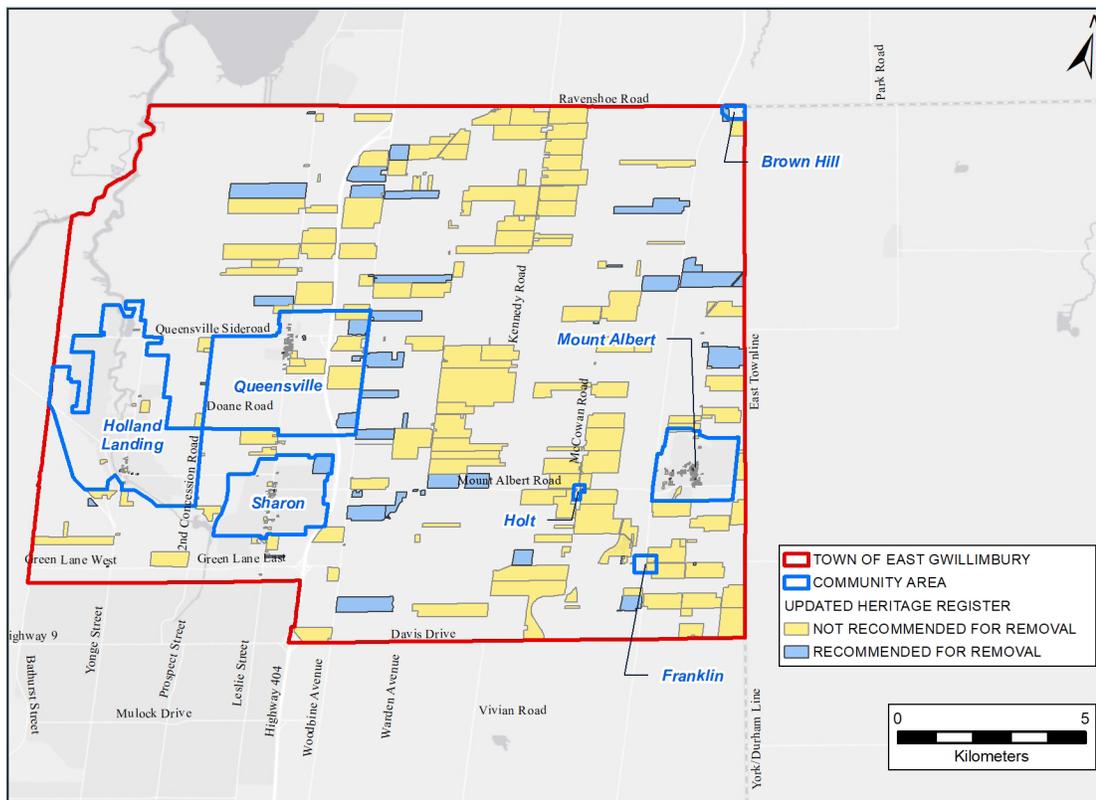

8.2 Summary of Evaluation Results

The following mapping reflects the results of the evaluation. The properties not recommended for removal from the Heritage Register:

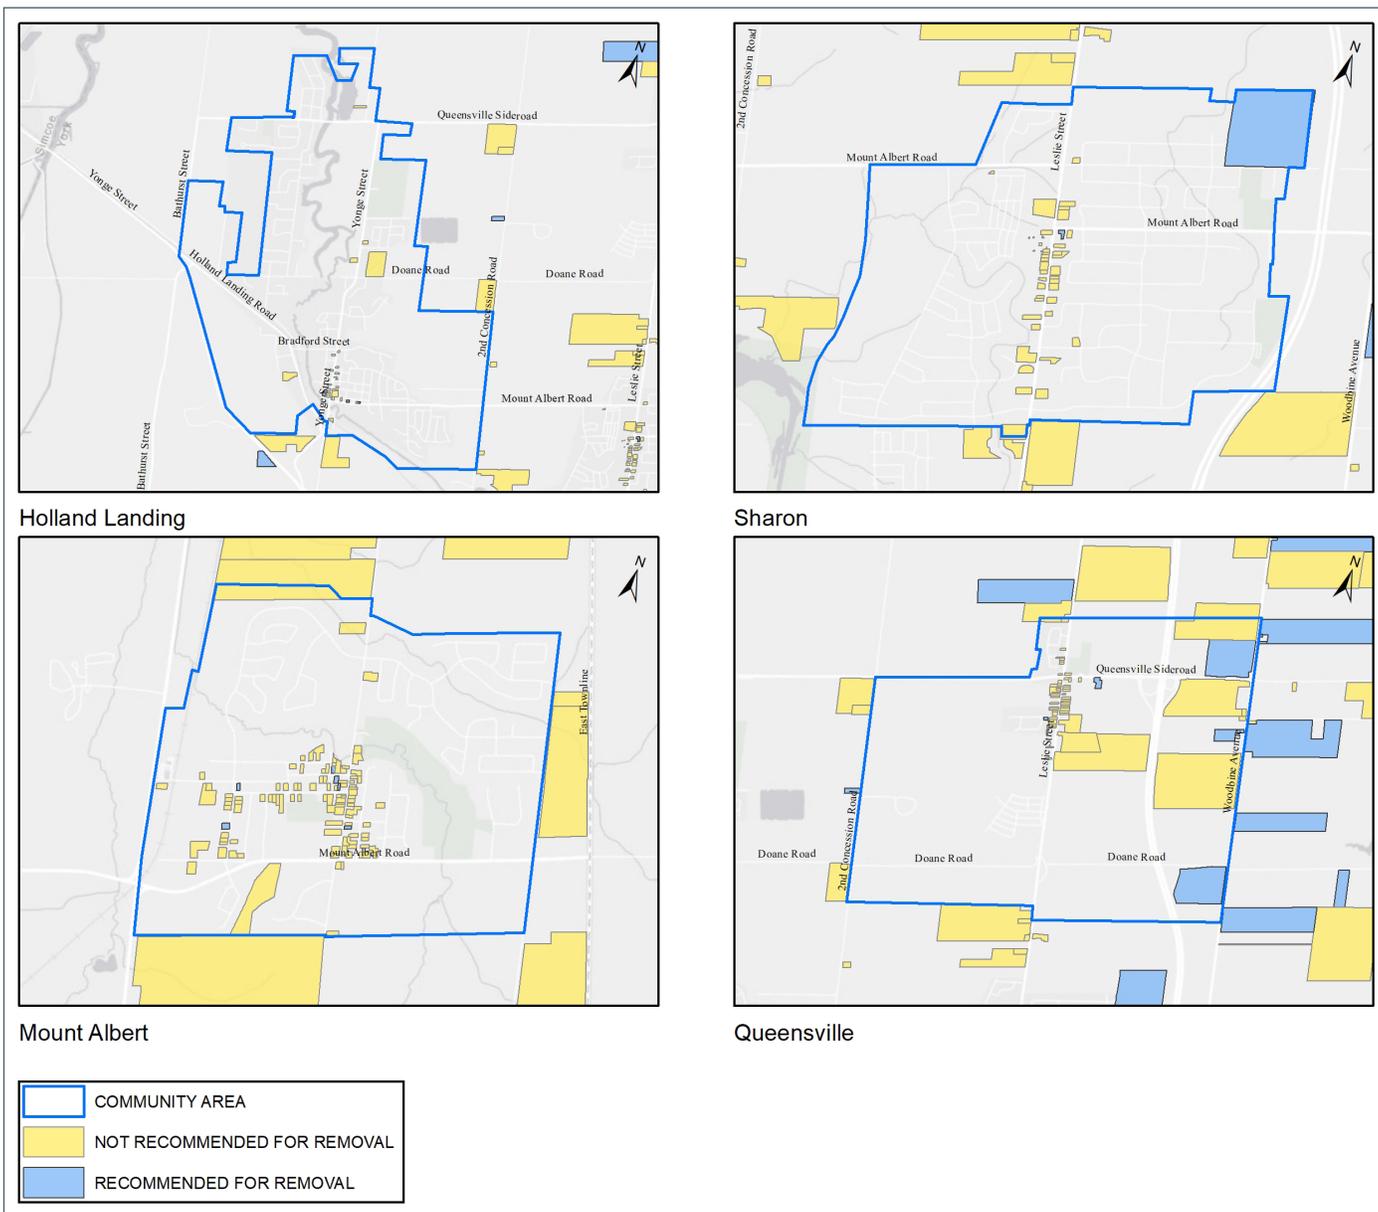

- Reflect important themes in the Town’s growth and development as expressed in the historical context statements.
- Meet the eligibility standards embedded in its associated theme.
- Have character-defining/associative features that directly relate to the potential or known heritage value of its associated theme and building type.
- Meet the integrity considerations correlated to its associated theme.

Detailed property information is included in Appendix D for all properties not recommended for removal from the Heritage Register.

Appendix C includes a list of properties that are recommended to be considered for removal from the Heritage Register. These appendices reflect the consultant team recommendations. The consultant team recommended 120 properties for removal from the Heritage Register. Town Staff recommended an additional 22 properties for removal from the Heritage Register. Of these 142 properties one property will not be removed following public consultation, the Heritage Advisory Committee identified 20 properties which will remain on the Heritage Register. A further 50 properties are remaining on the Heritage Register due to Council amendment on February 9, 2021. This has resulted in 69 properties being removed from the Heritage Register and 394 properties remaining on the Heritage Register. A compiled list of final results of the Heritage Register Review is included in Appendix E.

Map 16: Evaluation Results

Map 17: Evaluation Recommendations within Community Areas.

9.0 Conclusions and Recommendations

The Heritage Register Review project has established a consistent and efficient set of tools for the evaluation of properties currently included on the Town of East Gwillimbury Heritage Register. These tools included:

- A thematic historical framework identifying significant themes, people and event which reflect the periods and property types included on the existing Heritage Register;
- Historical context statements based on O. Reg. 9/06 which define the significance of a geographical area, property type or time period including eligibility standards, character defining/associative features and integrity considerations;
- Review and standardization of the Town's existing Heritage Register data; and
- A systematic methodology using established historical context statements to comparatively understand and analyze the properties.

The review has resulted in the following recommendations:

- Update the information of properties not recommended for removal from the Heritage Register to include standardized data, related historical context statement, and values (Appendix D)
- The Village of Mount Albert should be prioritized for a Heritage Conservation District study to determine if the area merits designation under Part V of the *OHA*. It is strongly recommended that properties within Mount Albert remain on the Heritage Register until such time a Heritage Conservation District Study has been undertaken.

- The following properties should be prioritized for further study for potential designation under Part IV of the *OHA*:
 - 6 Alice Street (ID 58)
 - 19127 Centre Street (ID 62)
 - 19139 Centre Street (ID 82)
 - 31 Main Street (ID 104)
 - 48 Main Street (ID 112)
 - 5623 Mount Albert Road (ID 134)
 - 19180 Yonge Street (ID 37)
 - 19188 Yonge Street (ID 30)
 - 19911 Yonge Street (ID 28)
 - 20317 Leslie Street (ID 179)
 - 20366 Leslie Street (ID 149)
 - 20453 Leslie Street (ID 170)
 - 20463 Leslie Street (ID 189)
 - 18532 Leslie Street (ID 420)
 - 18794 Leslie Street (ID 415)
 - 18922 Leslie Street (ID 421)
 - 5551 Ravenshoe Road (ID 2)
 - 2624 Boag Road (ID 204)
 - 22741 Catering Road (ID 216)
 - 21388 Highway 48 (ID 266)
 - 21689 Kennedy Road (ID 273)
 - 21711 Kennedy Road (ID 272)
 - 21711 Kennedy Road (ID 318)
- The initial screening process of the properties on the current Heritage Register identified some instances where the wrong property was potentially listed on the register. In these cases, the address listed on the register does not match the property description and/or the property image provided by the Town

(see Appendix B, properties marked with an asterisk*). Council should consider the removal of these properties from the Heritage Register and consider listing the intended properties as described in Appendix B.

- ♦ The evaluation process identified four instances where properties should be entered or further researched to verify the information on file about the property (Appendix B). These properties are 1527 Queensville Sideroad (ID 192), 18447 Centre Street (ID 221), 18838 Leslie Street (ID 413), and 18846 Leslie Street (ID 414).

For these properties, it is recommended that a Cultural Heritage Evaluation Report be conducted to determine whether the property should remain on the Heritage Register or be considered for removal for lacking significance.

- ♦ There are minor data inconsistencies in the roll numbers provided by the Town. It is recommended that the Town combine any differing information from duplicate records into one "listing" and remove the duplicate from the list of properties on the Heritage Register.

Appendix A: Historical Context Statements

Agricultural

Example of an agricultural property, 4592 Mount Albert Road (ASI 2019)

Example of an agricultural property, 18855 Centre Street (ASI 2019)

Statement of Significance

Resources that are significant within this theme are generally intact examples of agricultural properties that typically contain a residential building and associated agricultural outbuildings, such as barns, silos, and sheds. The properties evaluated under this theme are representative of the agricultural development that was prominent during the early settlement and establishment of the Town of East Gwillimbury. Agricultural development in the early settlement of the area, and its continued growth following the introduction of a rail line from Toronto, was significant to the overall prosperity of the Town in the nineteenth and early twentieth centuries. Properties that are associated with this development and prosperity are significant to the history of the Town.

The lots and concessions that were delineated following the construction of Yonge Street

were vital to the establishment of agricultural development in the Town. Resources that are significant within the Agricultural theme are located within rural areas in the Town and reflect this early pattern of settlement and agricultural development.

Significant resources date from approximately 1800 to 1913. This period broadly covers the earliest periods of European settlement following the Stegman Survey of the Township to the decline of agricultural development brought on by the onset of the First World War and the shift towards village and suburban development within the present-day boundaries of the Town. Early properties within this theme typically date from 1800 to 1820, after which point settlements became more established throughout the Town.

Associated Building Type(s)

- ♦ Residential – Single Family
- ♦ Barns and Outbuildings

Eligibility Standards

- ♦ Dates from the period of significance, 1800-1913
- ♦ Represents an early period of settlement and agricultural development in a rural setting within the Town
- ♦ Is a surviving and intact example of the type in its setting

Character Defining/Associative Features

Property Features

- ♦ Buildings are set back on parcel
- ♦ Laneway driveway leading to residential and associated outbuildings, with farmland surrounding the built form

Residential Buildings

- ♦ One to two-and-a-half storeys
- ♦ Log, wood frame or masonry construction
- ♦ Hipped or gable roof
- ♦ Wood cladding or brick are the primary

exterior material

Barns and Outbuildings

- ♦ Stone or concrete foundation
- ♦ Wood or timber frame construction
- ♦ Gable or gambrel roof

Integrity Considerations

- ♦ Should retain contextual integrity
 - Laneway driveway
 - Surrounded by farmland
 - Rural setting
- ♦ Some original materials may be altered or removed
 - For early examples, which are increasingly rare, there may be a greater degree of alteration or fewer extant features
 - Buildings serving agricultural functions (barns, silos, sheds, etc.) are more prone to alteration and modification due to their utilitarian nature, and therefore may also have a greater degree of alteration or fewer extant features

Rural Civic and Institutional

Former Mount Zion School, S.S. No 10 (ASI 2019)

Former Holt School, S. S. No. 6 (ASI 2019)

Statement of Significance

Resources that are significant within this theme are extant examples of civic or institutional properties within rural areas of the Town of East Gwillimbury. Typically, these properties will either have served an educational, governmental, community-based, commercial or religious function for the rural community in its proximity. Cemeteries and family burial grounds are also identified resources within the Rural Civic and Institutional theme, as they also served a community service. The resources evaluated under this theme are typically representative of early settlement and the establishment of the Town, as they are indicative of community building and societal development for rural residents. Properties that are associated with the establishment of rural communities are significant to the history of the Town.

The addition of civic and institutional properties to serve rural areas during the early settlement years were vital to the establishment of

permanent communities, supporting cultural and social growth during the agricultural boom in the nineteenth century. Resources that are significant within the Rural Civic and Institutional theme are usually located within rural areas in the Town and reflect this early establishment of communities for rural residents. These areas include the hamlets of Brown Hill, Franklin, Holt (formerly Eastville) Maple Hill, Ravenshoe, and Alder.

Significant resources date from approximately 1800 to 1913. This period broadly covers the early rural settlement to the decline of constructing civic and institutional buildings with the shift towards village and suburban development within the present-day boundaries of the Town. Early properties within this theme typically date from 1800 to 1820, after which point settlements became more established throughout the Town.

Associated Building Type(s)

- ♦ Institutional – Education (School Houses)
- ♦ Governmental – Post Office
- ♦ Governmental/Community-based – Train Station
- ♦ Community-based – Town and Community Halls
- ♦ Commercial
- ♦ Civic – Religious (Churches)
- ♦ Civic – Cemeteries and Burial Grounds

Eligibility Standards

- ♦ Dates from the period of significance, 1800-1913
- ♦ Represents an early period of settlement and community development in a rural setting within the Town
- ♦ Is a surviving and intact example of the type in its setting

Character Defining/Associative Features

Property Features

- ♦ Visually prominent from roadway

Institutional – Education (School Houses)

- ♦ One to one-and-a-half storeys
- ♦ Wood frame or masonry construction
- ♦ Gable roof
- ♦ Typically two entrances on main facade
- ♦ Wood cladding or brick are the primary exterior material

Governmental – Post Office

- ♦ One to three storeys
- ♦ Wood frame or masonry (brick) construction
- ♦ Occasionally architect designed

Civic – Train Station

- ♦ One to one-and-a-half storeys
- ♦ Wood frame or masonry (brick) construction
- ♦ Gable or hipped roof
- ♦ Occasionally architect designed

Civic – Town and Community Halls

- ♦ One to two storeys
- ♦ Wood frame or masonry (brick) construction
- ♦ Gable roof

Commercial Buildings

- ♦ Two to four storeys
- ♦ Wood frame or masonry construction
- ♦ Flat roof, or gable roof with street-facing parapet wall
- ♦ Wood cladding or brick are the primary exterior material
- ♦ Large window openings at street level
- ♦ Cast or pressed metal storefront surrounds

Civic – Religious (Churches)

- ♦ One to one-and-a-half storeys
- ♦ Wood frame or masonry construction
- ♦ Hipped or gable roof
- ♦ Wood cladding or brick are the primary exterior material
- ♦ Occasionally architect designed

Civic – Cemeteries and Burial Grounds

- ♦ Headstones
- ♦ Boundaries delineated by fence
- ♦ Entrance gate
- ♦ May have associations with a specific hamlet or religious groups

Integrity Considerations

- ♦ Should retain contextual integrity
 - Prominent from roadway
 - Rural setting
- ♦ Some original materials may be altered or

removed

- For early examples, which are increasingly rare, there may be a greater degree of alteration or fewer extant features

Holland Landing

Yonge Street looking north, Holland Landing, undated (Toronto Public Library)

Section of Yonge Street that rises from the village of Holland Landing, 1928 (Archives of Ontario)

Statement of Significance

Resources that are significant within this theme are properties that are typically associated with the settlement and early development of Holland Landing. The properties evaluated under this theme represent a variety of building types that are typical of village settlement in the area, such as: residential; commercial; civic and institutional; and, industrial. Significant resources will generally be associated with the social, political, cultural and economic growth of Holland Landing. Significant properties could include those that are associated with prominent or influential persons in Holland Landing or the Town, or have a connection to a notable event.

Located at the terminus of Yonge Street and along the east branch of the Holland River, Holland Landing has a history rooted in transportation and trade. While this history predates European settlement and the construction of Yonge Street, the built environment that remains in the area today

is reflective of the settlement and community development that occurred from the early nineteenth century to the mid twentieth century. Therefore, significant resources in the Holland Landing theme are those that date from 1800 to 1913. Early properties within this theme typically date from 1800 to 1820, after which point settlement became more established within Holland Landing.

As Yonge Street and the Holland River are important features in the settlement and development of Holland Landing, properties that are located adjacent to, or interacting with, these features are significant. Other significant locations or property specifications in this theme are resources that reflect the lots and concessions that were delineated as part of the construction of Yonge Street at the end of the eighteenth century, or those located on early roadways.

Associated Building Type(s)

- ♦ Residential – Single Family
- ♦ Residential – Multifamily
- ♦ Commercial – Main Street
- ♦ Commercial – Bank
- ♦ Institutional – Education (School House)
- ♦ Civic – Post Office
- ♦ Civic – Train Station
- ♦ Civic – Town and Community Halls
- ♦ Civic – Religious (Churches)
- ♦ Civic – Cemeteries and Burial Grounds
- ♦ Industrial – Mill and manufacturing

Eligibility Standards

- ♦ Dates from the period of significance, 1800-1913
- ♦ Represents an early period of settlement and community development within the limits of Holland Landing
- ♦ Is a surviving and intact example of the type in its setting
- ♦ Is located on Yonge Street or Mount Albert Road
- ♦ Is located on or adjacent to the Holland River

Character Defining/Associative Features

- ♦ Retains most of the essential physical features from the period of significance
- ♦ May be associated with a notable person or event in Holland Landing and/or the Town
- ♦ Contributes to the social, political, and economic history of Holland Landing and/or the Town

Residential Buildings

- ♦ One to two-and-a-half storeys
- ♦ Wood frame or masonry construction
- ♦ Hipped or gable roof
- ♦ Wood cladding or brick are the primary exterior material

Commercial Buildings

- ♦ Two to four storeys
- ♦ Wood or masonry construction
- ♦ Flat roof, or gable roof with street-facing parapet wall
- ♦ Wood cladding or brick are the primary exterior material
- ♦ Large window openings at street level
- ♦ Cast or pressed metal storefront surrounds

Institutional – Education (School Houses)

- ♦ One to one-and-a-half storeys
- ♦ Wood frame or masonry construction
- ♦ Gable roof
- ♦ Typically two entrances on main façade
- ♦ Wood cladding or brick are the primary exterior material

Civic – Post Office

- ♦ One to three storeys
- ♦ Wood frame or masonry (brick) construction
- ♦ Occasionally architect designed

Civic – Train Station

- ♦ One to one-and-a-half storeys
- ♦ Wood frame or masonry (brick) construction
- ♦ Gable or hipped roof
- ♦ Occasionally architect designed

Civic – Town and Community Halls

- ♦ One to two storeys
- ♦ Wood frame or masonry (brick) construction
- ♦ Gable roof

Civic – Religious (Churches):

- ♦ One to one-and-a-half storeys
- ♦ Wood frame or masonry construction
- ♦ Hipped or gable roof
- ♦ Wood cladding or brick are the primary exterior material
- ♦ Occasionally architect designed

Civic – Cemeteries and Burial Grounds

- ♦ Headstones
- ♦ Boundaries delineated by fence
- ♦ Entrance gate
- ♦ May have associations with a specific hamlet or religious groups

Industrial

- ♦ One to three storeys

- ♦ Wood-frame, heavy timber or masonry construction
- ♦ Multi-light, industrial sash windows
- ♦ Large service entrances
- ♦ Open, flexible floor plan

Integrity Considerations

- ♦ Setting may have changed (surrounding buildings and land uses) as a result of expansion and growth within the limits of Holland Landing
- ♦ Should retain integrity of design and materials
 - For early examples, which are increasingly rare, there may be a greater degree of alteration or fewer extant features
- ♦ Should retain associative value if tied to notable person or event
 - As their value is associative, a greater degree of alteration or fewer extant features does not significantly diminish integrity

Sharon

Walnut Farm, Sharon, undated (Sharon Temple Museum Society)

Children of the Peace Temple, now known as Sharon Temple, 1860 (Toronto Public Library)

Statement of Significance

Resources that are significant within this theme are properties that are associated with the settlement and early development of Sharon. The properties evaluated under this theme represent a variety of building types that are typical of village settlement in the area, such as: residential; commercial; civic and institutional; governmental, and, industrial. Significant resources will be generally associated with the social, political, cultural and economic growth of Sharon. Significant properties could include those that are associated with prominent or influential persons in Sharon or the Town, or have a connection to a notable event.

The original village of Sharon (known as Hope) today a village core in the Town, was directly influenced by the Quaker denomination known as the Children of the Peace. The group met and worshiped on the farmland of the denomination's leader, David Willson, at the beginning of the nineteenth century. The village of Sharon grew and developed around this farm, and the area continued to act as a place of religious expression

throughout the nineteenth and into the early twentieth century. Significant resources in this theme are those that are associated with the development of religious practices within Sharon and were constructed during the nineteenth century. Other building types constructed during the nineteenth century that support the social, economic and cultural growth of Sharon are also considered significant. Therefore, significant resources in the Sharon theme are those that date from 1800 to 1913. Early properties within this theme typically date from 1800 to 1820, after which point settlement became more established within Sharon.

Resources that are located on or adjacent to the original location of Willson's farm are significant, as they reflected the earliest settlement pattern in Sharon. Other significant locations or property specifications in this theme are resources that reflect the lots and concessions that were delineated as part of the construction of Yonge Street at the end of the eighteenth century, or those located on early roadways.

Associated Building Type(s)

- ♦ Residential – Single Family
- ♦ Residential – Multifamily
- ♦ Commercial – Main Street
- ♦ Commercial – Bank
- ♦ Institutional – Education (School House)
- ♦ Civic – Post Office
- ♦ Civic – Train Station
- ♦ Civic – Town and Community Halls
- ♦ Civic – Religious (Churches)
- ♦ Civic – Cemeteries and Burial Grounds
- ♦ Industrial – Mill and manufacturing

Eligibility Standards

- ♦ Dates from the period of significance, 1800-1913
- ♦ Represents an early period of settlement and community development within the limits of Sharon
- ♦ Is a surviving and intact example of the type in its setting
- ♦ Is associated with religious activity
- ♦ Is located on or adjacent to the Willson farm
- ♦ Is located on an early roadway

Character Defining/Associative Features

- ♦ Retains most of the essential physical features from the period of significance
- ♦ May be associated with a notable person or event in Sharon and/or the Town
- ♦ Contributes to the social, political, and economic history of Sharon and/or the Town

Residential Buildings

- ♦ One to two-and-a-half storeys

- ♦ Wood frame or masonry construction
- ♦ Hipped or gable roof
- ♦ Wood cladding or brick are the primary exterior material

Commercial Buildings

- ♦ Two to four storeys
- ♦ Wood or masonry construction
- ♦ Flat roof, or gable roof with street-facing parapet wall
- ♦ Wood cladding or brick are the primary exterior material
- ♦ Large window openings at street level
- ♦ Cast or pressed metal storefront surrounds

Institutional – Education (School Houses)

- ♦ One to one-and-a-half storeys
- ♦ Wood frame or masonry construction
- ♦ Gable roof
- ♦ Typically two entrances on main façade
- ♦ Wood cladding or brick are the primary exterior material

Civic – Post Office

- ♦ One to three storeys
- ♦ Wood frame or masonry (brick) construction
- ♦ Occasionally architect designed

Civic – Train Station

- ♦ One to one-and-a-half storeys
- ♦ Wood frame or masonry (brick) construction
- ♦ Gable or hipped roof
- ♦ Occasionally architect designed

Civic – Town and Community Halls

- ♦ One to two storeys
- ♦ Wood frame or masonry (brick)

construction

- ♦ Gable roof

Civic – Religious (Churches)

- ♦ One to one-and-a-half storeys
- ♦ Wood frame or masonry construction
- ♦ Hipped or gable roof
- ♦ Wood cladding or brick are the primary exterior material
- ♦ Occasionally architect designed

Civic – Cemeteries and Burial Grounds

- ♦ Headstones
- ♦ Boundaries delineated by fence
- ♦ Entrance gate
- ♦ May have associations with a specific hamlet or religious groups

Industrial

- ♦ One to three storeys
- ♦ Wood-frame, heavy timber or masonry construction

- ♦ Multi-light, industrial sash windows
- ♦ Large service entrances
- ♦ Open, flexible floor plan

Integrity Considerations

- ♦ Setting may have changed (surrounding buildings and land uses) as a result of expansion and growth within the limits of Sharon
- ♦ Should retain integrity of design and materials
 - For early examples, which are increasingly rare, there may be a greater degree of alteration or fewer extant features
- ♦ Should retain associative value if tied to notable person or event
 - As their value is associative, a greater degree of alteration or fewer extant features does not significantly diminish integrity

Queensville

Example of residential property in Queensville, 20340 Leslie Street (ASI 2019)

Example of a civic property in Queensville, 20453 Leslie Street (ASI 2019)

Statement of Significance

Resources that are significant within this theme are typically properties that are associated with the settlement and early development of Queensville. The properties evaluated under this theme generally represent a variety of building types that are typical of village settlement in the area, such as: residential; commercial; civic and institutional; and, industrial. Significant resources typically will be associated with the social, political, cultural, and economic growth of Queensville. Significant properties could include those that are associated with prominent or influential persons in Queensville or the Town or have a connection to a notable event.

The settlement in Queensville began in the early nineteenth century. Originally coined "Hackett's Corners" (today the intersection of Queensville Side Road and Leslie Street), the settlement was largely residential with civic and commercial buildings built to serve the community. Unique within the Town of East Gwillimbury is the use of river stone as an exterior cladding material in the residential properties constructed on

Queensville Side Road and Leslie Street during this period. The renaming of "Hackett's Corners" to Queensville in 1843 is indicative of the growth and establishment of the area by the mid-nineteenth century. Resources that date from the 1800 to 1913 are typically considered significant with the theme, as they are representative of the settlement and establishment of the area. Early properties within this theme typically date from 1800 to 1843, which pre-date the renaming of Queensville and its more formal establishment.

As Queensville Side Road and Leslie Street are historic roadways and central to the development and growth of Queensville as a village core. Resources located on either roadway within the boundaries of Queensville are significant. Other significant locations or property specifications in this theme are resources that reflect the lots and concessions that were delineated as part of the construction of Yonge Street at the end of the eighteenth century, or those located on early roadways.

Associated Building Type(s)

- ♦ Residential – Single Family
- ♦ Residential – Multifamily
- ♦ Commercial – Main Street
- ♦ Commercial – Bank
- ♦ Institutional – Education (School House)
- ♦ Civic – Post Office
- ♦ Civic – Train Station
- ♦ Civic – Town and Community Halls
- ♦ Civic – Religious (Churches)
- ♦ Civic – Cemeteries and Burial Grounds
- ♦ Industrial – Mill and manufacturing

Eligibility Standards

- ♦ Dates from the period of significance, 1800-1913
- ♦ Represents an early period of settlement and community development within the limits of Queensville
- ♦ Is a surviving and intact example of the type in its setting
- ♦ Is a representative and intact of a distinct use of building material (river stone) in Queensville
- ♦ Is located on an early roadway

Character Defining/Associative Features

- ♦ Retains most of the essential physical features from the period of significance
- ♦ May be associated with a notable person or event in Queensville and/or the Town
- ♦ Contributes to the social, political, and economic history of Queensville and/or the Town

Residential Buildings

- ♦ One to two-and-a-half storeys

- ♦ Wood frame or masonry construction
- ♦ Hipped or gable roof
- ♦ River stone, wood cladding or brick are the primary exterior material

Commercial Buildings

- ♦ Two to four storeys
- ♦ Wood or masonry construction
- ♦ Flat roof, or gable roof with street-facing parapet wall
- ♦ Wood cladding or brick are the primary exterior material
- ♦ Large window openings at street level
- ♦ Cast or pressed metal storefront surrounds

Institutional – Education (School Houses)

- ♦ One to one-and-a-half storeys
- ♦ Wood frame or masonry construction
- ♦ Gable roof
- ♦ Typically two entrances on main façade
- ♦ Wood cladding or brick are the primary exterior material

Civic – Post Office

- ♦ One to three storeys
- ♦ Wood frame or masonry (brick) construction
- ♦ Occasionally architect designed

Civic – Train Station

- ♦ One to one-and-a-half storeys
- ♦ Wood frame or masonry (brick) construction
- ♦ Gable or hipped roof
- ♦ Occasionally architect designed

Civic – Town and Community Halls

- ♦ One to two storeys
- ♦ Wood frame or masonry (brick)

construction

- ♦ Gable roof

Civic – Religious (Churches)

- ♦ One to one-and-a-half storeys
- ♦ Wood frame or masonry construction
- ♦ Hipped or gable roof
- ♦ Wood cladding or brick are the primary exterior material
- ♦ Occasionally architect designed

Civic – Cemeteries and Burial Grounds

- ♦ Headstones
- ♦ Boundaries delineated by fence
- ♦ Entrance gate
- ♦ May have associations with a specific hamlet or religious groups

Industrial

- ♦ One to three storeys
- ♦ Wood-frame, heavy timber or masonry construction

- ♦ Multi-light, industrial sash windows
- ♦ Large service entrances
- ♦ Open, flexible floor plan

Integrity Considerations

- ♦ Setting may have changed (surrounding buildings and land uses) as a result of expansion and growth within the limits of Queensville
- ♦ Should retain integrity of design and materials
 - For early examples, which are increasingly rare, there may be a greater degree of alteration or fewer extant features
- ♦ Should retain associative value if tied to notable person or event
 - As their value is associative, a greater degree of alteration or fewer extant features does not significantly diminish integrity

Mount Albert

Example of a civic property in Mount Albert, 19139 Centre Street (ASI 2019)

Example of residential property in Mount Albert, 46 King Street (ASI 2019)

Statement of Significance

Resources that are significant within this theme are typically properties that are associated with the settlement and early development of Mount Albert. The properties evaluated under this theme generally represent a variety of building types that are typical of village settlement in the area, such as: residential; commercial; civic; institutional; and, industrial. Significant resources will typically be associated with the social, political, cultural, and economic growth of Mount Albert. Significant properties could include those that are associated with prominent or influential persons in Mount Albert or the Town or have a connection to a notable event.

Mount Albert grew as a village in the early nineteenth century as a result of two key factors, the Black River and the introduction of the Canadian National Railways in the late nineteenth century. Branches of both ran through present-day Mount Albert and were the impetus for industrial and commercial growth in the area in the nineteenth century. Resources that are associated with the (now abandoned) rail line

and branches of the Black River (Mount Albert Creek and Vivian Creek) are significant to this growth. The residential, civic, and institutional resources that were constructed to support the establishment of industry and commercial prosperity are also significant. These resources are representative of the settlement and the establishment of Mount Albert as a village, and the eastern-most village core in the Town. Therefore, significant resources in the Mount Albert theme are those that date from 1800 to 1913. Early properties within this theme typically date from 1800 to 1820, after which point settlement became more established within Mount Albert.

As the Canadian National Railways, Mount Albert Creek and Vivian Creek are important features to the development of Mount Albert. Other significant locations within this theme are properties located along the early roadways, which include present-day: Mount Albert Road; Centre Street; Main Street; Princess Street; and, King Street.

Associated Building Type(s)

- ♦ Residential – Single Family
- ♦ Residential – Multifamily
- ♦ Commercial – Main Street
- ♦ Commercial – Bank
- ♦ Institutional – Education (School House)
- ♦ Civic – Post Office
- ♦ Civic – Train Station
- ♦ Civic – Town and Community Halls
- ♦ Civic – Religious (Churches)
- ♦ Civic – Cemeteries and Burial Grounds
- ♦ Industrial – Mill and manufacturing

Eligibility Standards

- ♦ Dates from the period of significance, 1800-1913
- ♦ Represents an early period of settlement and community development within the limits of Mount Albert
- ♦ Is associated with early commercial or industrial activity
- ♦ Is the founding or long-term location of a business or industry significant in Mount Albert and/or the Town
- ♦ Is a surviving and intact example of the type in its setting
- ♦ Is located on Mount Albert Road, Centre Street, Main Street, Princess Street, and/or King Street
- ♦ Is located on or adjacent to Mount Albert or Vivian Creeks (branches of the Black River)

Character Defining/Associative Features

- ♦ Retains most of the essential physical features from the period of significance
- ♦ May be associated with a notable person

or event in Mount Albert and/or the Town

- ♦ Contributes to the social, political, cultural and economic history of Mount Albert and/or the Town

Residential Buildings

- ♦ One to two-and-a-half storeys
- ♦ Wood frame or masonry construction
- ♦ Hipped or gable roof
- ♦ Wood cladding or brick are the primary exterior material

Commercial Buildings

- ♦ Two to four storeys
- ♦ Wood or masonry construction
- ♦ Flat roof, or gable roof with street-facing parapet wall
- ♦ Wood cladding or brick are the primary exterior material
- ♦ Large window openings at street level
- ♦ Cast or pressed metal storefront surrounds

Institutional – Education (School Houses)

- ♦ One to one-and-a-half storeys
- ♦ Wood frame or masonry construction
- ♦ Gable roof
- ♦ Typically two entrances on main façade
- ♦ Wood cladding or brick are the primary exterior material

Civic – Post Office

- ♦ One to three storeys
- ♦ Wood frame or masonry (brick) construction
- ♦ Occasionally architect designed

Civic – Train Station

- ♦ One to one-and-a-half storeys
- ♦ Wood frame or masonry (brick)

construction

- ♦ Gable or hipped roof
- ♦ Occasionally architect designed

Civic – Town and Community Halls

- ♦ One to two storeys
- ♦ Wood frame or masonry (brick) construction
- ♦ Gable roof

Civic – Religious (Churches)

- ♦ One to one-and-a-half storeys
- ♦ Wood frame or masonry construction
- ♦ Hipped or gable roof
- ♦ Wood cladding or brick are the primary exterior material
- ♦ Occasionally architect designed

Civic – Cemeteries and Burial Grounds

- ♦ Headstones
- ♦ Boundaries delineated by fence
- ♦ Entrance gate
- ♦ May have associations with a specific hamlet or religious groups

Industrial

- ♦ One to three storeys
- ♦ Wood-frame, heavy timber or masonry

construction

- ♦ Multi-light, industrial sash windows
- ♦ Large service entrances
- ♦ Open, flexible floor plan

Integrity Considerations

- ♦ Setting may have changed (surrounding buildings and land uses) as a result of expansion and growth within the limits of Mount Albert
- ♦ Should retain integrity of design and materials
 - For early examples, which are increasingly rare, there may be a greater degree of alteration or fewer extant features
 - Commercial properties, which are prone to alteration and modernization, may display a greater degree of change but are still considered significant if the original massing and some identifying details are retained
- ♦ Should retain associative value if tied to notable person or event
 - As their value is associative, a greater degree of alteration or fewer extant features does not significantly diminish integrity

World Wars and Post-War Period

Fourth Queensville School, 20317 Leslie Street circa 1925 (Property Information Files, undated)

Statement of Significance

Resources that are significant within this theme are properties that are associated with the development and expansion of the Town of East Gwillimbury during the First and Second World Wars, and in the Post-War period. The properties evaluated under this theme represent a variety of building types that are typical of early- and mid-twentieth century construction patterns and built forms. Resources that reflect themes of modernization and globalization are significant. Significant resources will be associated with the social, political, cultural, and economic growth of Town of East Gwillimbury, including both rural areas and its village cores. Significant properties could include those that are associated with prominent or influential persons in the Town or have a connection to a notable event that occurred during this period.

The built environment of the Town of East Gwillimbury is largely representative of its

nineteenth century settlement. While most construction within the Town had declined by the World Wars and in the Post-War period, those that were constructed represent an important period of time. These properties speak to the enduring presence of the village cores, and the continued commercial, agricultural and economic activity throughout the Town. Therefore, significant resources in the World Wars and Post-War theme are those that date from 1914-1969.

Resources significant within this theme could be located in rural areas or within village cores. As their construction post-date the settlement of the Town of East Gwillimbury, properties within village cores will typically be infill properties or located on the outer limits where there was less development.

Associated Building Type(s)

- ♦ Residential – Single Family
- ♦ Residential – Multifamily
- ♦ Commercial – Main Street
- ♦ Commercial – Bank
- ♦ Institutional – Education (School House)
- ♦ Civic – Post Office
- ♦ Civic – Community Centres
- ♦ Civic – Religious (Churches)
- ♦ Civic – Cemeteries and Burial Grounds
- ♦ Industrial – Mill and manufacturing

Eligibility Standards:

- ♦ Dates from the period of significance, 1914-1969
- ♦ Represents the continued growth and development of the Town of East Gwillimbury during the twentieth century
- ♦ Is associated with commercial or industrial activity
- ♦ Is associated with or expansion of a long-term business or industry significant in Town
- ♦ Is a surviving and intact example of the type in its setting

Character Defining/ Associative Features:

- ♦ Retains most of the essential physical features from the period of significance
- ♦ May be associated with a notable person or event in the Town
- ♦ Contributes to the social, political, cultural and economic history of the Town

Residential Buildings:

- ♦ One to two storeys
- ♦ Wood frame or masonry construction

- ♦ Small setback from lot line
- ♦ Hipped or gable roof
- ♦ Simple ornamentation
- ♦ Wood, aluminum or brick cladding are the primary exterior material
- ♦ May be constructed as part of larger development

Commercial Buildings:

- ♦ One to two storeys
- ♦ Masonry, concrete or curtain-wall construction
- ♦ Flat roof, or gable roof with street-facing parapet wall
- ♦ Brick or concrete are the primary exterior material
- ♦ Large window openings at street level
- ♦ Wood, cast-iron or aluminum storefront

Institutional – Education (School Houses):

- ♦ One to two storeys
- ♦ Masonry or concrete construction
- ♦ Gable or flat roof
- ♦ Typically a single main entrance on primary facade
- ♦ Brick or concrete are the primary exterior material
- ♦ Playgrounds and/or recreational/athletic fields on property or adjacent

Civic – Post Office

- ♦ One to two storeys
- ♦ Masonry or concrete construction
- ♦ Occasionally architect designed

Civic – Community Centres

- ♦ One to two storeys
- ♦ Masonry or concrete construction
- ♦ Gable, hipped or flat roof

Civic – Religious (Churches):

- ♦ One to one-and-a-half storeys
- ♦ Masonry or concrete construction
- ♦ Hipped or gable roof
- ♦ Wood cladding, brick or concrete are the primary exterior material
- ♦ Occasionally architect designed

Civic – Cemeteries and Burial Grounds:

- ♦ Headstones
- ♦ Boundaries delineated by fence
- ♦ Entrance gate
- ♦ May have associations with a specific hamlet or religious groups

Industrial:

- ♦ One to three storeys
- ♦ Modern wood-frame, masonry, concrete or curtain-wall construction
- ♦ Multi-light, industrial sash windows
- ♦ Large service entrances

- ♦ Open, flexible floor plan
- ♦ Office functions

Integrity Considerations:

- ♦ Setting influenced by earlier settlement patterns, and may have changed as a result of continued expansion and growth within the limits of the Town
- ♦ Should retain integrity of design and materials
 - Commercial properties, which are prone to alteration and modernization, may display a greater degree of change but are still considered significant if the original massing and some identifying details are retained
- ♦ Should retain associative value if tied to notable person or event
 - As their value is associative, a greater degree of alteration or fewer extant features does not significantly diminish integrity

Properties that are Not Visible from the Public Right-of-Way and Property Information File Provides Inadequate or No Photograph of the Primary Building

Properties which were not visible from the public right-of-way were screened and evaluated based on the photographs provided by the Town in combination with aerial and satellite images. The following properties were not visible from the public right-of-way and the property information file did not contain sufficient photography of the primary building to appropriately evaluate the cultural heritage value or interest. Due to the lack of information, the consultant team determined that these 14 properties should remain on the Heritage Register until such a time a proper cultural heritage evaluation can be conducted. The Town of East Gwillimbury staff, however, have recommended that these properties be considered for removal from the Heritage Register. Following consultation with the Heritage Advisory Committee and Council, nine of the 14 properties will not be removed from the Heritage Register.

ID No.	Roll Number	Address
